

## **Foreign Exchange Market**

In the reporting period, USD exchange rate decreased by 0.6 percent from KGS 68.8395 to 68.4325 per USD at the foreign exchange market year-to-date. The currency supply was maintained by the market participants, mainly due to the US dollars received as a result of the decashing, conversion transactions, the deposits, and SWAP transactions.

In the reporting period, the aggregate turnover of interbank foreign exchange trades increased by 7.9 percent over the month and amounted to USD 30.3 million. Due to retaining balance of demand and supply of foreign currency, the National Bank of the Kyrgyz Republic did not conducted interventions in the reporting period. The volume of transactions between the commercial banks increased by 34.1 percent.

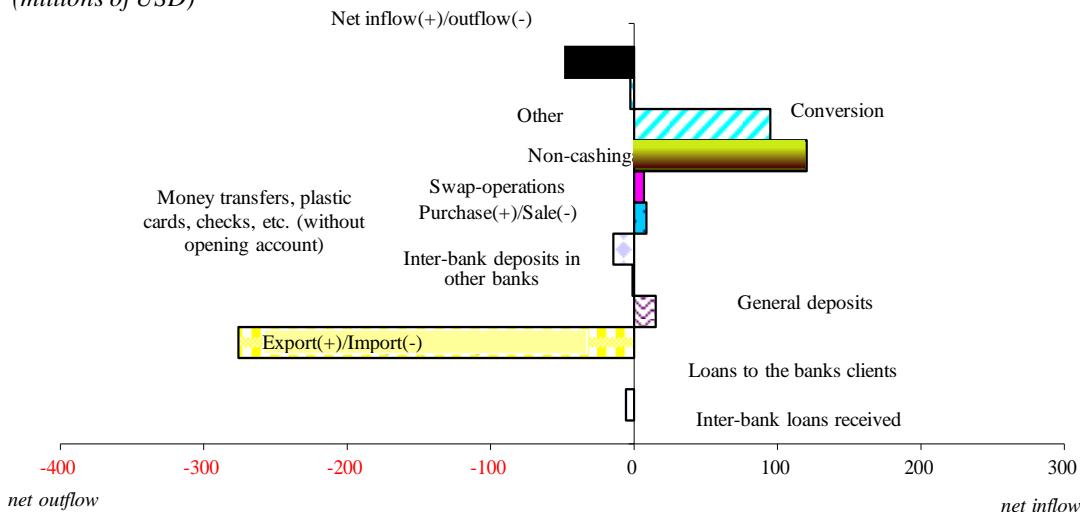

The total volume of transactions on foreign currency purchase and sale increased by 9.1 percent over the month, due to the increase in the volume of all types of transactions. Thus, the volume of non-cash transactions of the commercial banks increased by 15.3 percent, cash transactions of the commercial banks – by 12.7 percent and the volume of cash transactions of the exchange offices – by 4.8 percent.

In the reporting period, the increase was observed in the volumes of transactions in all currencies. The volume of transactions conducted in the Kazakh tenge increased by 64.9 percent, in euro – by 32.5 percent, in the US dollars - by 10.3 percent, in the Russian rubles – by 3.4 percent, and in other currencies – by 14.6 percent. As a consequence, the equity ratio of currencies in the total volume of transactions did not significantly changed.

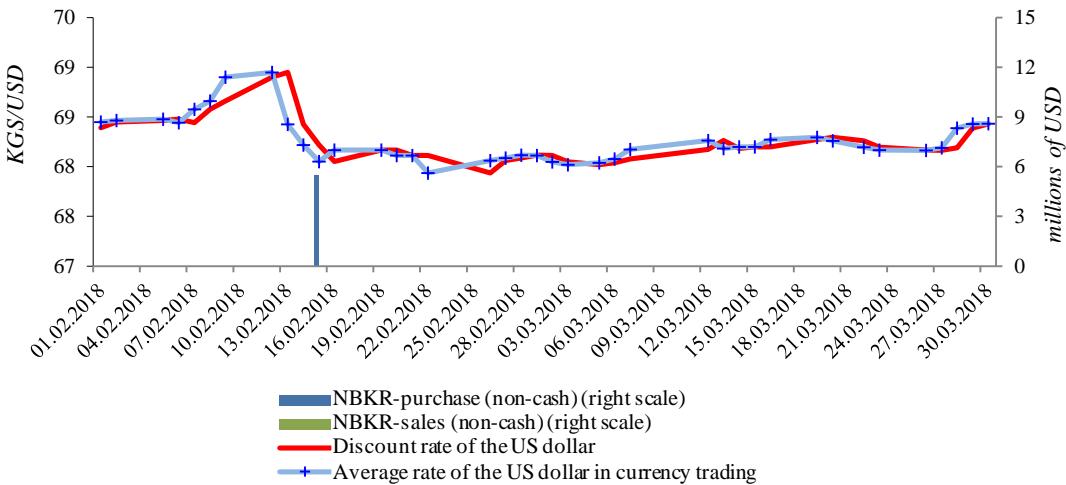

In the reporting period, the National Bank of the Kyrgyz Republic did not conduct any SWAP transactions with the commercial banks.
