

Foreign Exchange Market

(January 2017)

In the reporting period, an insignificant decrease in the U.S. currency exchange rate from KGS 69.2301 to 69.1338 per dollar (-0.1 percent) in the foreign exchange market was observed. The currency supply was maintained by market participants generally through the deposits, as well as dollars received from conversion transactions of banks and cash-to-non-cash transactions.

The total volume of sale/purchase transactions of foreign currency amounted to KGS 30.1 billion, having decreased by 12.5 percent compared to the previous month. This was caused by the decrease in volumes of cash transactions of commercial banks by 23.8 percent, down to KGS 14.3 billion. At the same time, the volumes of non-cash transactions of commercial banks increased by 40.9 percent, up to KGS 4.7 billion, while cash transactions of exchange offices decreased by 9.8 percent, down to KGS 11.1 billion.

The aggregate turnover of interbank foreign exchange auctions increased by 43.3 percent, up to USD 59.1 million, compared to the previous month. This was caused by currency interventions carried out by the National Bank of the Kyrgyz Republic, which has increased the foreign currency sales from USD 1.8 million to USD 17.7 million, as well as the growth of transactions between commercial banks by 5.0 percent, up to USD 41.4 million.

In the reporting period, the National Bank of the Kyrgyz Republic did not conduct SWAP transactions with commercial banks.

By types of currencies, there was a decrease in volumes of transactions in USD, RUB and KZT. At the same time, the currency ratio in the total volume of transactions performed was as follows: the share of transactions in USD made 64.6 percent (+3.7 percentage points), the share of transactions in RUB – 30.7 percent (-3.9 percentage points), the share of transactions in EUR – 2.8 percent (+0.4 percentage points), in KZT – 1.9 percent (-0.2 percentage points).
