Balance of Payments of the Kyrgyz Republic

«Balance of payments of the Kyrgyz Republic» is issued by the National Bank of the Kyrgyz Republic. The legislative basis for the balance of payments are the Law of the Kyrgyz Republic as of July 29, 1997 No. 59 “On the National Bank of the Kyrgyz Republic” and the Resolution of the Government of the Kyrgyz Republic as of November 3, 2000 No. 645 “On measures to improve statistics of the balance of payments of the Kyrgyz Republic”. This document reflects last tendencies in external sector development and shows statistical data on the balance of payments, external trade, international reserves, external debt and international investment position, as well as construction methods of balance of payments and informational database. This document is published 4 times a year - in January, May, July and October and has 3 language versions: Kyrgyz, Russian and English.

The National Statistics Committee made amendments to the State Classifier of Economic Activities in 2014 (Version 3). In this regard, correlation of historical data by types of economic activities has become impossible.

Last day for update of data for the present publication is January 20, 2015.

Annotation symbols and notes:

... means the absence of data;

— means, that indicators/ratios are equal to 0 (zero) or insignificant;

- is set between years or months (e.g., 1994-1996 or January-June) and means, that all years and months are covered by the shown dates.

Deviations in last digits may occur because of rounding numbers when summing up.

In regard with the possible changes in accounting methods or historical data, which are used in the given document, correction of earlier published data is acceptable. Therefore, 10 years period can be accounted as “open period”.

Other publications of the National Bank of the Kyrgyz Republic

Annual Report of the National Bank of the Kyrgyz Republic

This document is an overall report of the National Bank for the last year. It includes summary on economic development of the republic and monetary policy, as well as the National Bank financial statements, general information and statistical reviews. It is published in 3 languages: Kyrgyz, Russian and English.

Bulletin of the National Bank of the Kyrgyz Republic

Informational publication includes statistical data on the basic macroeconomic indicators and economy sectors of the Kyrgyz Republic. It is published in 3 languages: Kyrgyz, Russian and English.

Monetary Policy Report (Inflation Report of the Kyrgyz Republic)

This publication describes dynamics of consumer prices in the republic and regions, analysis of the main inflation factors, informs about the National Bank decisions on monetary policy and provides with inflation preview for the forthcoming period. It is published quarterly in Kyrgyz, Russian and English.

Report on Stability of the Financial Sector of the Kyrgyz Republic

The report reflects the NBKR's evaluation of foreign and domestic economic factors influencing the financial stability, the conditions of banks and other financial intermediate institutions, as well as the analysis of the current state of affairs in the financial markets and the stability of financial sector of Kyrgyzstan. It is published twice a year in Kyrgyz, Russian and English.

Statutory Acts of the National Bank of the Kyrgyz Republic

The purpose of the document is to publish statutory acts of the National Bank in order to provide commercial banks and public with statutory acts and official information on the National Bank activity, as well as propaganda of the Kyrgyz Republic banking legislation. Presumable publication frequency is once a month in Kyrgyz and Russian languages.

Press-Release of the National Bank of the Kyrgyz Republic

“Press-release of the National Bank” describes current events, which take place in National Bank and provides with the major data on the financial market. It is published weekly in Kyrgyz and Russian languages.

Publications of the National Bank are distributed in accordance with approved delivery list. They can also be found on the National Bank web-site: <http://www.nbkr.kg>

THE CURRENT STATUS OF THE BALANCE OF PAYMENTS

Chart 1. Current Account

in percent of GDP¹

According to the results for the nine months of 2014, there was observed a decrease in the current account deficit up to 20.1 percent to GDP, due to the improvement of the state of trade balance.

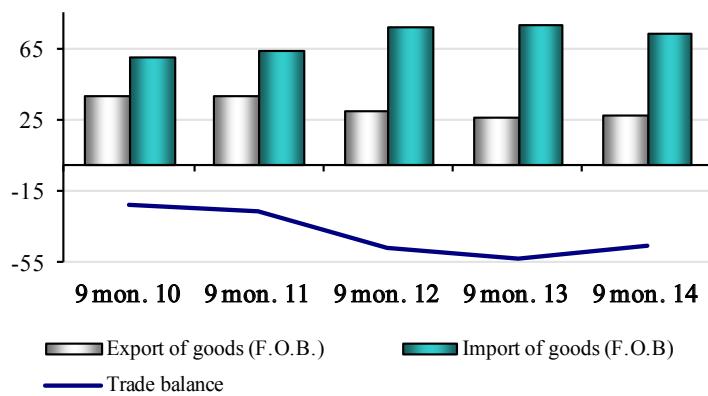

According to the estimates of the National Bank, the negative balance of the current account with consideration of the additional estimates of the National Bank of the Kyrgyz Republic² constituted 720.2 million US dollars (12.3 percent to GDP).

TRADE BALANCE

According to the results for the nine months of 2014, there was a decrease in the deficit of the trade balance, mainly due to the increase in export of precious metals and decrease in the volume of import of petroleum products.

Chart 2. Trade balance of the Kyrgyz Republic

in percent of GDP

Trade balance of the Kyrgyz Republic, for the nine months of 2014, kept with a negative balance in the amount of 2 429.3 million US dollars, having decreased by 10.8 percent as compared to the similar indicator of the respective period of 2013.

The external trade turnover in FOB prices in the reporting period decreased by 4.5 percent and constituted 4 949.0 million US dollars.

The export of goods in FOB prices with account of the additional estimates of the National Statistics Committee (NSC) and the National Bank of the Kyrgyz Republic (NBKR) amounted to 1 259.9 million US dollars³, having increased by 2.5 percent as compared to the indicator for January-September of 2013.

The export dynamics is mainly determined by the increase in the supply of gold. **The export excluding gold⁴** in January-September of 2014 constituted 857.4 million US dollars, having decreased by 8.0 percent as compared to the respective indicator for the nine months of 2013. In the reporting period, the major volume of decrease fell under such large items, as “fruits and nuts” and “motor vehicles for the transport of goods and special-purpose motor vehicles”.

¹ Here and hereinafter, the graphic figures to GDP are calculated based on sliding annual data, including the last four quarters.

² The final estimates on re-export of petroleum products and export on trade of “shuttles”.

³ The volume of export without re-estimates of NBKR and NSC amounted to 1 096.1 million US dollars.

⁴ In FOB prices, by taking into account re-estimates of NBKR and NSC; in January-September 2014 the export without taking into account gold amounted to 693.6 million US dollars (without re-estimates of NBKR and NSC).

The export excluding gold and re-export⁵ estimate decreased by 3.9 percent and constituted 556.1 million US dollars.

*NSC data in FOB prices, excluding estimates of NBKR and NSC

¹ Export of on-board stock

In the reporting period, the export dynamics of the major positions of goods affected the change in the structure of export by ISTC. Due to an increase in the export of gold, a specific weight of the section “goods and operations, not included in other categories of ISTC” increased by 8.6 percentage points and reached 36.7 percent. A decrease in the specific weight of the group “manufactured goods, classified by kind of material” is mainly caused by the reduction in the volume of supplies of cast iron, steel, various base metals, rubber tyres and float glass. A decrease in the volume of export of vehicles for the transport of goods and special-purpose vehicles and other transport vehicles played a key role in the reduction of the specific weight of the group “vehicles and transport equipment” up to 10.5 percent in the total volume of export. Specific weights of the rest of the groups of goods in January-September 2014 have not changed or remained at the level similar to the one in the respective period of the previous year.

⁵ In FOB prices, without re-estimates of NBKR and NSC.

Table 2. Structure of Export by the SITC sections*

(unit weight, in percent)

Beverages and tobacco	2,5	1,5	1,5	1,7	2,5

*NSC data in FOB prices

In the sectoral structure of export of the Kyrgyz Republic, the primary specific weight falls under products of **processing industry** (metallurgical, textile and garment industry) and **agriculture**.

A production growth of **metallurgical products** by 7.3 percent⁶, attributable to the increase in the volumes of production and affinage of precious metals, positively affected the volumes of export of gold. Despite a decrease in the average contractual prices by 13.2 percent⁷, the growth of the physical volume of export of gold by 55.7 percent led to the increase in the cost volume of export of gold by 35.2 percent.

With regard to other products of metallurgical production, with the exception of iron and steel, metal scrap and waste of non-ferrous base metals, there was a slight increase in the volume of supplies.

Table 3. Export of major products of metallurgical production*

⁶ "Socio-Economic Regulation of KR (January-September, 2014)", NSC of KR.⁷ In January-September 2014, the average world price for 1 XAU constituted 1 288.0 US dollars, which is by 11.5 percent lower than the level of prices for the similar period of 2013; Source: Reuters.

A decrease in the production volume of textile, clothes and shoes, leather and leather made items, which was observed in January-September 2014⁸, affected a decrease in the volumes of export of clothes and clothes accessories by 6.7 percent. The supply of the groups “women’s or girls’ articles of textile fabrics” and “men’s or boys’s articles of textile fabric” decreased (by 10.7 and 16.2 percent respectively). The export of goods under “clothing accessories, knitted and not-knitted” also declined by 6.4 percent. A decrease in the supply volume of goods under all those mentioned groups became a result of the reduction of the average export price.

With regard to the rest of the groups of textile production goods, there was an increase in the volumes of export, due to the growth of the factual volumes of supply.

Table 4. Export of major products of clothing manufacture*

Denomination;	<i>unit of measurement</i>	9 mon. 10	9 mon. 11	9 mon. 12	9 mon. 13	9 mon. 14

*NSC data in FOB prices, excluding estimates of NBKR and NSC

According to the results for January-September of 2014 the production volumes of **agricultural products** decreased by 2.2 percent⁹. Such decrease affected a decline of the supply volumes of nearly all large items in this group of goods. A substantial decline was observed in the supply of fruits and nuts (by 46.7 percent), due to the decrease of both the factual volumes of supply and contractual price of exported goods. The export volumes of vegetables, meat and meat products, live animals and cereal products also declined, mainly due to the reduction of the factual export volumes. Having said that, in the reporting period, an increase in the supply of milk and milk products, as well as cotton was observed, which is mainly attributable to the growth of the physical volumes of export.

⁸ According to NSC, in January-September 2014, the volume of textile production and production of clothes and shoes, leather and other leather items decreased by 18.5 percent.

⁹ “Socio-Economic Regulation of KR (January-September 2014)”, NSC of KR.

*NSC data in FOB prices, excluding estimates of NBKR and NSC

¹ A significant volume of export in real terms in 2013 due to an increase in the supply of honey bees to Kazakhstan

According to the results for the nine months of 2014, a specific weight of the registered **re-export¹⁰** in the total volume of export decreased from 17.1 to 12.5 percent (137.5 million US dollars). As it was mentioned above, the reduction of re-export is mainly caused by the decrease in the supply of goods under “motor vehicles for the transport of goods and special-purpose motor vehicles”, the export volumes of which decreased by 13.4 percent. Besides that, the supply of iron and steel, rubber tyres, parts and accessories of the motor vehicles and some other groups of goods also decreased. Along with this, in January-September 2014, an increase was observed in the re-export of goods under groups “other inorganic chemicals” and “aircraft and associated equipment”.

¹⁰ Re-export is the export of foreign (earlier manufactured in other countries and imported) goods from the country, where they were earlier imported, without any significant transformations as compared to their conditions in which they were initially imported.

Table 6. Re-export of major products*
(in millions of US dollars)

Denomination	9 mon. 10	9 mon. 11	9 mon. 12	9 mon. 13	9 mon. 14
Total re-export	163,2	78,5	146,9	180,7	137,5

Other goods	40,3	29,6	36,8	47,6	39,1

*NSC data in FOB prices, excluding estimates of NBKR and NSC

The geographic structure of export has undergone changes in the reporting period.

As compared to January-September 2013, a specific weight of the non-CIS countries exceeded the respective indicator of the CIS countries (53.7 and 46.3 percent respectively). The growth of the share of the non-CIS countries is caused by the changes in the export dynamics of gold. The specific weight of Switzerland, despite an increase in the cost volume of export, in the reporting period decreased from 26.4 to 24.8 percent. The redirection of the part of the export of gold to the United Arab Emirates led to the growth of the share of this country from 3.3 to 10.5 percent. In the reporting period, in almost all of the large trade partners from the non-CIS countries, except for USA, there was an increase in the cost volume of export, which led to the growth of their specific weights.

In the reporting period, there was a decrease in the general volume of export to the Russian Federation, Kazakhstan and Belarus by 10.9 percent. As a result, a specific weight of the countries-members of the Customs Union decreased from 40.9 to 35.2 percent.

In general, in the reporting period, the Kyrgyz Republic exported goods to 83 countries of the world (in January-September 2013 the export was carried out to 84 countries).

The geographic distribution of export of the main kinds of goods, based on the results of the nine months of 2014 has not undergone any substantial changes. The CIS countries remain the major commodity markets for the traditional export positions of the Kyrgyz Republic, except for gold. Nevertheless, an increase in the specific weight of the non-CIS countries should be noted in the supply of such goods, as vegetables, fruits and nuts. Accordingly, the share of Turkey in the export of vegetables reached 41.1 percent (it was 27.0 percent in January-September 2013), and the specific weight of China in the export of fruits and nuts – 10.3 percent (it was 2.0 percent according to the results for the nine months of 2013).

Along with this, it should be noted that the level of geographic concentration remains high on the majority of the largest export goods.

* NSC data at CIF prices

In the reporting period, **in the goods structure** of import, the largest specific weight, by the sections of ISTC, was given to machinery and transport equipment (23.9 percent). The cost volume of import of goods of the given group decreased by 10.8 percent and constituted 953.7 million.¹¹ The main influence on the reduction in the given group was made by the decrease in the import of vehicles for the transport of goods and special-purpose vehicles. Along with this, the volumes of import of goods of such items as “road tractors for semi-trailers”, “parts and accessories of the motor vehicles”, “mechanical shovels, excavators and shovel-loaders” decreased. Such decrease was partially compensated by the increase in the volumes of imported motor cars and trucks, previously used, and other vehicles for construction and mining industry.

It must be noted that separate goods of this group, such as parts and accessories of the motor vehicles, aircraft and associated equipment, vehicles for the transport of goods and special-purpose vehicles and others are partially imported for the further re-export.

¹¹ According to NSC data in CIF prices.

* NSC data at CIF prices

A specific weight of the group “mineral fuel, lubricants and related materials”, according to the results for the nine months of the current year decreased by 0.9 percentage points and constituted 20.1 percent (801.2 million US dollars in terms of value). The prevailing specific weight in this group falls under the petroleum products.

In the reporting period, the volume of import of petroleum products decreased by 10.0 percent. The given reduction occurred due to the decrease in the physical volume of import of petroleum products by 9.0 percent and average contractual prices by 1.1 percent, as compared to the corresponding figures of January-September 2013. The major contribution to the reduction of import of fuel, petroleum and lubricants was made by motor gasoline, diesel and aviation fuel, the import volumes of which decreased in the aggregate by 16.6 percent (by 127.5 million US dollars in absolute terms). In the meantime, the supply of fuel oil, crude and other petroleum products increased (in the aggregate by 2.0 times or by 46.6 million US dollars).

* NSC data at CIF prices

Besides the fuel and lubricants, a significant share in the group “mineral fuel, lubricants and related materials” falls under natural gas and coal. In the reporting period, their supplies decreased by 28.2 and 11.4 percent respectively (by 13.9 and 3.3 million US dollars in absolute terms).

A specific weight of the manufactured goods, classified by type of material, decreased by 0.5 percentage points and reached 17.5 percent from the total volume of imported goods, which became a result of the reduction in the cost volume of supplies by 4.1 percent. The largest goods in the given group comprises “iron and steel” items, the import’s cost volume of which in the reporting period increased by 7.8 percent in relation to the nine months of 2013. Textile fabric, rubber tyres, various articles made from paper, metal and construction materials are also considered as the important goods of this group. For the nine months of 2014, the import volume of the remaining goods of the given group decreased in the aggregate by 8.6 percent and constituted 482.7 million US dollars. Such dynamics was caused by the changes in both the physical volume of import and the import prices.

* NSC data at CIF prices

In the geographic distribution of import for the reporting period, despite a decrease in the cost volume of supplies by 5.7 percent, a specific weight of the countries of the Customs Union slightly increased (from 44.6 to 45.1 percent). The cost volume of import from other countries decreased in a more considerable value (by 7.4 percent), which caused a decrease of their shares in the total volume of import from 55.4 to 54.9 percent.

A dependance of the country on the energy carriers, consumer goods and some types of raw materials is caused by the fact that the dominant part of import prevails a specific weight of goods imported from Russia (33.0 percent), China (21.5 percent) and Kazakhstan (10.2 percent).

The Russian Federation remains the main supplier of the fuel and lubricant materials. The import of the main food products was also carried out from the CIS countries. The largest groups of food products, such as cereals and products from cereal, sugar, vegetable oil and others are imported from the above mentioned countries.

A specific weight of the non-CIS countries is more appreciable in the structure of the imported non-food consumer goods. Accordingly, an aggregate specific weight of China and Turkey on the clothes supplies exceeded 94.4 percent. More than 88.0 percent of imported vehicles come from the non-CIS countries, predominantly from Japan, Germany, Korea and the USA.

* NSC data at CIF prices

In general in the reporting period import to the Kyrgyz Republic was carried out from 138 countries of the world (in January – September of 2013 – from 128 countries).

BALANCE OF INTERNATIONAL SERVICES

Following the decrease in the volume of external trade activity in the Kyrgyz Republic the turnover of international services also declined in the reporting period.

Chart 3. External service and goods trade*
(in millions of US dollars)

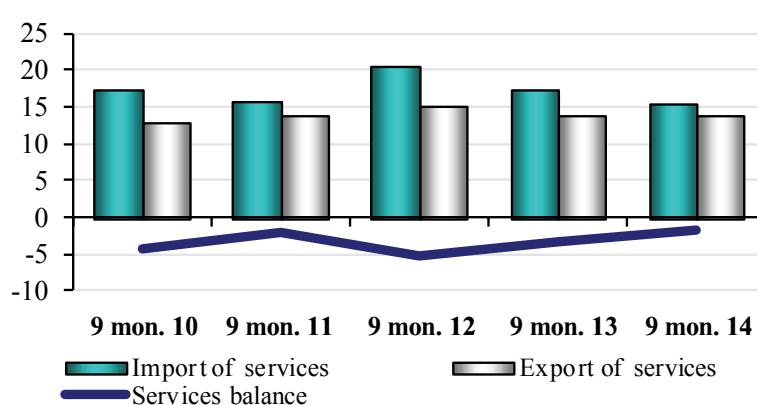

* including estimate of NBKR and NSC

volume of services provided by the residents of the Kyrgyz Republic decreased by 5.6 percent.

According to the results for the nine months of the current year, the turnover of international services decreased by 1.2 percent, 1 565.2 million US dollars.

The balance of international services (neutral presentation of the balance of payment) was held negative and constituted 220.8 million US dollars, which exceeds the deficit of the balance of services in the respective period of the previous year by 37.6 percent. In the meantime, the import of services increased by 2.3 percent, while the

Chart 4. Balance of International services
in percent of GDP

In January – September 2014 the balance of “travels” was in profit and constituted 23.3 million US dollars, which is by 81.8 percent lower than the comparable figure for the nine months of 2013. This became a result of the decrease by 13.3 percent in the export of services related to travels, whereas the volume of services provided by the citizens of the Kyrgyz Republic while being abroad increased by 20.7 percent.

The balance of transport services in the reporting period as before was held negative and constituted 322.8 million US dollars, which is by 3.3 percent lower than in January-September of 2013. Meanwhile, an advance decrease in the export of transport services (by 19.1 percent) was observed,

as compared to the decrease of their import (by 7.7 percent). The decrease in the volume of transport services provided by non-residents occurred primarily due to the reduction in the export of air transport services by 25.5 percent. A decrease in the volume of import of services provided by railway and motor vehicle transport (by 9.0 and 22.2 percent respectively) determined the dynamics of the decrease in the total volume of transport services provided by the residents of the country.

The net export of business services for the reporting period was held positive and reached 24.2 million US dollars, having increased by 10.2 percent as compared to the respective period of the previous year. The improvement of the business services indicators became possible due to the advance decrease in the import of this kind of services as compared to their export (by 23.6 and 16.2 percent respectively). The reduction in the volume of provided consulting services became the main factor for the decrease in both the import and the export of business services.

INCOME

The dynamics of the item line “income” was mainly determined by the change in the volume of income of direct investments accrued to the payment by non-residents.

In January-September 2014 the balance of the item line “income” formed negative and constituted 199.3 million US dollars, which is by 15.0 percent less than the respective figure for the nine months of 2013.

The given tendency was mainly conditioned by the decrease in the income of direct foreign investors from the investment activity in the Kyrgyz Republic, due to the decline in the volume of re-invested income of entities from 177.5 to 123.8 million US dollars (decrease by 30.2 percent). The volume of distributed income of the resident companies in the form of dividends increased by 2.0 times in favor of the foreign direct investors and reached 24.4 million US dollars in the reporting period. As a result, the deficit of income on direct investments declined from 189.4 to 148.2 million US dollars (decrease by 21.8 percent).

In the reporting period, the volume of payment of interests on previously received credits increased by 11.0 percent due to the growth of payment on credits of the state sector and constituted 46.7 million US dollars. Meanwhile, the volume of other income received on other investments by the residents of the country decreased from 13.5 to 12.8 million US dollars. In general, this contributed to the increase in the deficit of the item “other investments income” by 19.0 percent (up to 33.9 million US dollars).

According to the results for the nine months of 2014, the balance of the item line “remuneration” formed negative and constituted 17.2 million US dollars, having decreased by 3.4 percent, which was due to the reduction in the aggregate volume of income from the labour activity of non-residents in the Kyrgyz Republic.

TRANSFERS

The growth rates of earnings under the item line “the current transfers” have slowed down, however remained positive.

The positive balance of **the current transfers**, upon the results for the nine months of 2014, reached 1 671.5 million US dollars, having exceeded the level in the comparable period of the previous year by 4.9 percent.

The private transfers (other sectors) made a determinative influence on the account of current transfers, the net inflow of which increased by 1.1 percent and constituted 1 587.5 million US dollars. There was an increase in both the inflow and the outflow of private transfers (by 2.9 and 13.5 percent respectively).

In the structure of private transfers, as before, the value of remittances of the labor migrants is significant; their specific weight constitutes 98.2 percent of the gross volume of earnings from the private transfers. In the reporting period, as before, the more dynamic growth of the remittances' outflow from the country, as compared to the gross inflow of the remittances' volume, led to the moderate growth of the net volume of the incoming transfers up to 1 553.6 million US dollars (increase by 1.9 percent).

Table 13. Structure of workers' remittances*

(in millions of US dollars)

	9 mon. 10	9 mon. 11	9 mon. 12	9 mon. 13	9 mon. 14

* Including estimates of NBKR

¹ Remittances exceeding 3000 US dollar are not taken into account² Additional estimation coefficient of 10% is used for assessing remittances which migrants inflow in cash

The money transfer systems remain the major way of money transfers from the labor migrants to the country.¹² For the nine months of the current year, the net volume of transfers received through the money transfer systems constituted 1 411.7 million US dollars¹³, having exceeded by 2.0 percent the respective indicator for the nine months of 2013. Meanwhile, the geographic structure of money transfers remains mainly without changes. According to the results of the reporting period of 2014, the main share of money transfers was received from the Russian Federation (97.0 percent). The specific weight of other countries is significantly lower: 0.9 percent of transfers were received from Kazakhstan, 0.7 percent – from the USA. The prevailing specific weight of transfers, in the structure of transfers made from the Kyrgyz Republic, also falls under the Russian Federation (95.2 percent).

Chart 5. Balance of remittances and Net Export of Consumer Goods

in percent of GDP

Money transfers remain the major source of the trade deficit financing. The balance of money transfers still covers the net export of consumer goods, which in its turn was held negative and constituted 1 125.8 million US dollars.

In January – September of 2014 the balance of the current transfers to **the sector of state management** (neutral presentation of the payment balance) was held positive and constituted 84.0 million US dollars, which is by 3.4 times more than the respective indicator of the similar period of 2013.

¹² Anelik, Blizko, Contact, Migom, MoneyGram, Western Union, Unistream, Zolotaya Korona, Leader, Bystraya Pochta, Allyur and other money transfer systems and remittances via PE "Kyrgyzpochtasy".

¹³ Without additional estimates of NBKR.

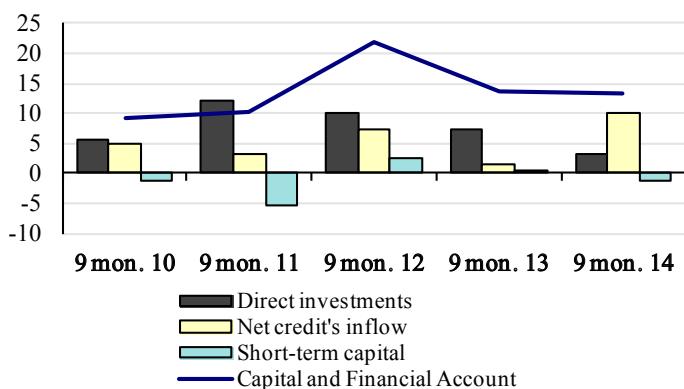

The volume of money grants received by the state sector constituted 86.1 million US dollars. The volume of paid membership fees to the international organisations in the reporting period increased by 15.6 percent and amounted to 2.2 million US dollars.

CAPITAL AND FINANCIAL ACCOUNTS

Capital and financial accounts were held positive, as before, in January-September of 2014. State sector loans played a key role in the formation of the considered accounts.

Chart 6. Capital and Financial Account

in percent of GDP

The capital and financial transactions accounts had a positive net balance in the amount of 586.1 million US dollars, upon the results of the nine months of 2014, which is by 23.0 percent less than the corresponding indicator of the respective period of 2013.

The net balance of the **capital account transactions** was held positive in the amount of 35.3 million US dollars, which is by 85.7 percent lower than the level, reached in January-September of 2013. The decrease of the indicators in the reporting

period was based due to the write-off the debt by the Russian Federation in the amount of 188.9 million US dollars in the second quarter of 2013¹⁴, which significantly increased the surplus of the capital account transactions for the nine months of 2013.

The financial account for the nine months of 2014 held a positive net balance in the amount of 550.7 million US dollars, which is by 7.0 percent more than in January-September of 2013. The main inflow of capital in the reporting period was observed in the item line “other investments”.

According to the results of the nine months of 2014, the net volume of funds attracted to the republic under “**other investments**” was formed with a positive value and reached 410.5 million US dollars. Increase in liabilities of the country’s residents to 685.8 million US dollars, due to the growth of attracted foreign loans to the economy, had the main impact on the dynamics of the “other investments”.

The net inflow of loans in the reporting period held a positive balance and amounted to 540.0 million US dollars.

The gross inflow of public sector loans was formed in the amount of 360.7 million US dollars, which by 65.6 percent exceeds the level of the respective period of 2013. Payments of the formal sector on the principal amount of debt upon the previously received loans in the reporting period constituted 37.9 million US dollars, which is substantially less than it was in the respective period of 2013 (219.2 million US dollars¹⁵). As a result, the net amount of loan funds received by the state reached 322.8 million US dollars against its negative value in the amount of 5.1 million US dollars in the corresponding period of 2013.

Amount of payments of the private sector upon the previously received loans service in the reporting period decreased by 22.4 percent and amounted to 233.2 million US dollars, while the inflow

¹⁴ Agreement between the Government of the Russian Federation and the Government of the Kyrgyz Republic on regulating the debt of the Kyrgyz Republic before the Russian Federation on the earlier provided loans.

¹⁵ In accordance with the methodology of the IMF Payments Manual Balance (5th edition), cancellation/write-off the debt in the amount of 188.9 million US dollars by the Russian Federation has also been reflected in the item line “amortization” of the state sector for the nine months of 2013.

of credit funds reached 450.4 million US dollars, increasing by 51.8 percent. As a result, the credit net flow to the private sector was in the amount of 217.2 million US dollars, while it had a negative figure in the amount 3.7 million US dollars in the respective period of the previous year.

The volume of credit indebtedness of the resident-entities in the reporting period amounted to 122.3 million US dollars (decrease by 1.8 per cent). In general, at the end of September 2014 the predominant specific weight in the total amount of credit indebtedness are taken by the manufacturing entities, institutions of professional, scientific and technical activities,¹⁶ as well as companies engaged in the provision of electricity and gas, wholesale and retail trade, and construction which together account for 93.1 percent of the total bills.

Assets of residents in the reporting period increased by 275.4 million US dollars, which was mainly due to the increase by 164.1 million US dollars in the amount of bills payable by residents. As of the end of September 2014, in total more than 89.0 percent of the gross volume of payable bills belonged to enterprises related to the wholesale and retail trade and manufacturing industries, institutions engaged in providing professional, scientific and technical activities, as well as sector of construction, information and communication.

In the given period, assets of residents placed in their accounts in foreign banks decreased to 10.2 million US dollars. As of the end of September 2014, more than 90.0 percent of the aggregate volume of remaining money funds balances on the accounts of entities abroad belonged to the entities of processing industry.

The net inflow of funds under the item line “**direct investments**” in the reporting period decreased by 72.7 percent and was formed in the amount of 145.9 million US dollars.¹⁷ The main impact on the dynamics of the given item was made by the decline in the net investment inflow in other capital.

The volume of funds invested in other capital held a negative value in the amount of 5.4 million US dollars (for the nine months in 2013, it held a positive value in the amount of 349.3 million US dollars), mainly due to growth of the volume of principal sums repayments on loans received by the resident entities from the foreign co-owners.

In the reporting period, by types of economic activity, the largest net inflow of direct investments was demonstrated by entities engaged in professional, scientific and technical activities, as well as business entities of the financial intermediation and insurance spheres. Among manufacturing entities, a net outflow of direct investors was observed. In the geographical structure of direct investments, the inflow of capital is dominated by the UK, Canada, Kazakhstan and Cyprus, while the outflow of direct investments was observed to Switzerland and the Virgin Islands.

According to the results for the nine months of 2014, the **total balance of payments** was held negative in the amount of 59.0 million US dollars.

The balance of the item line “**Errors and omissions**” was held positive in the amount of 532.9 million US dollars, which indicates an incomplete statistical accounting of transactions related to the inflow of capital into the country or export of goods and services. By taking into account the additional estimates of the National Bank, the balance of the item line “Errors and omissions” was held positive and amounted to 75.2 million US dollars.

The volume of gross international reserves at the end of September of 2014 amounted to 2 123.0 million US dollars, which covers 4.2 months of the future imports of goods and services.

¹⁶ The predominant specific weight of debt in this group accounts for economic entities engaged in the field of architecture and engineering activities, technical testing and monitoring, including geophysical, geological exploration, seismographic activities.

¹⁷ By taking into account the additional estimates of the National Bank of the Kyrgyz Republic.

Comment:

* including the allocation of SDR between the IMF countries-members to support their balance of payments had the impact on the value of foreign liabilities. As a result, the liabilities of the Kyrgyz Republic increased by US\$ 132.2 billion.

Long-term investments are investments in financial assets, whose initial maturity was set up, in compliance with a contract, as more than one year or has never been stipulated. Short-term investment are investments in financial assets, with maturity of one year or less than one year, pursuant to contract, or paid as short notice.
