Balance of Payments of the Kyrgyz Republic

"Balance of payments of the Kyrgyz Republic" is issued by the National Bank of the Kyrgyz Republic. The legislative basis for the balance of payments is the Law of the Kyrgyz Republic as of December 16, 2016 No. 206 "On the National Bank of the Kyrgyz Republic, banks and banking activity". This document reflects last tendencies in external sector development and shows statistical data on the balance of payments, external trade, international reserves, external debt and international investment position, as well as construction methods of balance of payments and informational database. This document is published 4 times a year in January, May, July and October and has 3 language versions: Kyrgyz, Russian and English.

This publication provides a separate box with extended version of the analytical form of the balance of payments of the Kyrgyz Republic, as well as international investment position of the Kyrgyz Republic compiled on the basis of BPM 6 methodology.

Last day for update of data for the present publication is January 20, 2018.

Annotation symbols and notes:

- ... means the absence of data;
- means, that indicators/ratios are equal to 0 (zero) or insignificant;
- is set between years or months (e.g., 1994-1996 or January-June) and means, that all years and months are covered by the shown dates.

Deviations in last digits may occur because of rounding numbers when summing up.

In regard with the possible changes in accounting methods or historical data, which are used in the given document, correction of earlier published data is acceptable. Therefore, 10 years period can be accounted as "open period".

CURRENT STATE OF THE BALANCE OF PAYMENTS

Chart 1. Current Account*(in percent of GDP)*

According to the results of nine months of 2017, the current account deficit¹ decreased amid insignificant increase in negative trade balance and growth in the volume of transfers and formed with negative balance at the level of 5.3 percent to GDP² or USD 228.8 million.

TRADE BALANCE

In January-September 2017, the main indicators of foreign trade were formed amid outrunning growth in the value of goods imports compared to exports thereof and conditioned increase of the negative trade balance.

Chart 2. Trade balance of the Kyrgyz Republic*(in percent of GDP)*

In January-September 2017, **trade balance**¹ of the Kyrgyz Republic in FOB prices was formed with negative balance in the amount of USD 1,771.7 million having increased by 5.4 percent as compared to the similar indicator of 2016. Meanwhile, in the reporting period, the indicator to GDP ratio made 31.7 percent.

The external trade turnover in FOB prices increased by 11.7 percent and constituted USD 4,328.9 million compared to January-September 2016.

Export of goods in FOB prices constituted USD 1,278.6 million having increased by 16.5 percent as compared to the indicator of January-September 2016. In the

reporting period, **the export excluding gold** constituted USD 817.9 million having increased by 25.6 percent as compared to the indicator of 2016.

The export excluding gold and the NBKR additional estimates increased by 25.0 percent and constituted USD 784.3 million.

¹ Hereinafter the information is submitted including additional estimates of the NSC KR according to sample survey of the mutual trade with the EAEU countries and additional estimates of the NBKR on export, unless another reference is given.

² Hereinafter the indicators of GDP ratios are calculated on the basis of sliding annual data, which include the last four quarters.

Note: NSC data in FOB prices

¹ Including the additional estimates of the NSC on agricultural products distributed by months according to the NBKR estimates and the NSC sample survey of individuals on mutual trade with the EAEU countries (since the 3rd quarter)² Export of on board stock

In January-September 2017, the increase of the exports value was observed on the main large commodity groups in export dynamics of the Kyrgyz Republic. In the reporting period, growth in the exports value was due to an increase in the supplies of products of the **processing industry** and **agriculture**. In January-September 2017, the increase of value was observed on these categories of goods due to the growth of production output in the metallurgical, textile and garment industry.

The increase in the value of gold exports by 3.4 percent³ was due to the growth in production of basic metals and finished metal products by 18.8 percent. The increase in gold exports was due to the growth of physical volume of supplies by 5.3 percent amid the decrease of average prices by 1.8 percent⁴.

³ “Social and Economic State of the Kyrgyz Republic (January-September 2017)”, NSC KR.⁴ In January-September 2017, the average world price for 1 Troy ounce of gold was USD 1,251.3, which is by 0.7 percent lower than the price level of January-September 2016; source: Reuters.

¹ A significant increase of exports in physical volume in 2015 was due to supplies of ashes and residues containing metals, having low cost.

Growth in production of clothes, shoes, leather and other leather goods in the textile sector by 9.0 per cent resulted from the increase in the output of the garment industry⁵. In January-September 2017, the increase in the value of exports was mainly due to the growth factor in the physical volumes of supplies. As a result, exports of clothes and clothing accessories increased by 2.1 times and constituted USD 107.8 million. The most significant growth in exports of the group was provided by the items "articles of textile fabrics, knitted or crocheted for men and boys" (by USD 23.9 million) and "articles of textile fabrics, knitted or crocheted for women and girls" (by USD 23.6 million).

* NSC data in FOB prices, including NSC additional estimates on agricultural products distributed by months according to NBKR estimates and NSC sample survey of individuals on mutual trade with EAEU countries (since the 3rd quarter of 2015), including NBKR additional estimates on export.

⁵ "Social and Economic State of the Kyrgyz Republic (January-September 2017)", NSC KR.

Growth in the gross output of the agricultural products in January-September 2017 was due to increased production of livestock main products⁵. As a result, the supplies of cheese and curd to the foreign markets increased by USD 12.0 million, live animals – by USD 6.3 million, milk – by USD 3.7 million. Multidirectional dynamics was observed in exports of the main crop production products: the value of fruits and nuts supplies increased by 2.2 times, while the supplies of vegetables decreased by 27.2 percent.

* NSC data in FOB prices, including NSC additional estimates on agricultural products distributed by months according to NBKR estimates and NSC sample survey of individuals on mutual trade with EAEU countries (since the 3rd quarter of 2015), including NBKR additional estimates on export.

According to the results of nine months of 2017, the specific weight of the non-EAEU countries constituted 63.9 percent (USD 795.0 million) in the geographic structure of exports. Switzerland traditionally remained a leading partner among the non-EAEU countries. The increase in gold exports resulted in growth in the share of Switzerland by up to 54.9 percent in the total exports to the non-EAEU countries. In the reporting period, Uzbekistan, China and Turkey were other significant trading partners among the non-EAEU countries. Energy products, manufactured goods, ores, concentrates of precious metals and agricultural products were mainly supplied to these countries.

Export of goods to the EAEU countries amounted to USD 450.0 million or 36.1 percent of the total volume of exported goods. The products of agriculture and processing industry dominate among the goods exported by the Kyrgyz Republic to the EAEU countries. The most significant volumes of supplies fell on the Russian Federation and the Republic of Kazakhstan.

⁵ “Social and Economic State of the Kyrgyz Republic (January-September 2017)”, NSC KR.

* NSC data in FOB prices, including NSC additional estimates on agricultural products distributed by months according to NBKR estimates and NSC sample survey of individuals on mutual trade with EAEU countries (since the 3rd quarter of 2015), including NBKR additional estimates on export.

¹ in percent to total of each good position

Import of goods in FOB prices according to the results of January-September 2017 constituted USD 3,050.3 million and increased by 9.8 percent as opposed to the same indicator of 2016.

In the goods structure of imports, supplies of the goods from the section "manufactured goods classified by material" amounted to USD 763.7 million. The value of imported goods from this section increased by 30.6 percent compared to January-September 2016 due to growth in the supplies of woven fabrics of man-made textile materials by USD 53.5 million, rubber tyres – by USD 18.1 million, pottery – by USD 14.8 million, and structure of iron and steel – by USD 11.0 million.

* NSC data in CIF prices

In the volume of imports, positive dynamics was observed in supplies of goods from the section "various manufactured products." During the reporting period, imports of the goods of this section increased by 4.4 percent compared to the similar period of 2016 and amounted to USD 589.2 million dollars. The most significant growth was observed on the items "shoes" and "printed materials" – the value of imports of these goods increased by USD 30.9 million and USD 6.9 million respectively. Decrease by USD 10.8 million was observed on the item "articles of apparel and clothing accessories". Insignificant changes were observed in the imports value for other goods items of the section.

* NSC data in CIF prices

In January-September 2017, imports of the goods items in the section "mineral fuel, lubricants, and related materials" increased by 17.8 percent compared to the similar period of 2016 and constituted USD 438.0 million. The specific weight of petroleum products was the most significant in the goods structure of imports. In the reporting period, the import value of the petroleum products increased by 19.1 percent compared to the same indicator of 2016, mainly due to the growth in the supplies of fuel oil (by USD 73.4 million). Increase in supplies of the petroleum products was due to growth of import prices by 39.8 percent amid decline in physical volumes by 14.8 percent.

* NSC data in CIF prices

According to the results of nine months of 2017, the specific weight of the non-EAEU countries decreased by 1.6 percentage points compared to the similar period of 2016 and constituted 58.9 percent in the **geographic structure** of import. China, Turkey, the United States and Uzbekistan are the most important foreign trade partners among the non-EAEU countries; the specific weight thereof was 78.1 percent of all supplies from the non-EAEU countries in the period under review. Fabrics, clothes, shoes, electric apparatus for telephony and cars have the main specific weight in the structure of goods imported from the non-EAEU countries.

The specific weight of supplies from the EAEU countries increased insignificantly and constituted 41.1 percent (40.2 percent for nine months of 2016). Fuel and energy products still prevail in the goods structure of imports from the EAEU countries. The Russian Federation was the main supplier of energy products. Broad list of consumer goods and construction materials were supplied to the Kyrgyz Republic besides energy carriers.

BALANCE OF INTERNATIONAL SERVICES

Growth of the volume of external trade activity of the Kyrgyz Republic was not supported by the corresponding growth in the turnover of international services.

Chart 3. External service and goods trade*

(in millions of USD)

* NSC data, including additional estimates of NBKR and NSC

Chart 4. Balance of international services

(in percent of GDP)

In the reporting period, balance of transport services was found negative and constituted USD 168.4 million, which is by 3.7 percent lower compared to the indicator for nine months of 2016. At the same time, there was growth in the export of transport services by 10.5 percent (caused by an increase of road transport services), whereas, the volume of import transactions increased by 2.2 percent (due to rail transport services).

Net export of business services in the reporting period was formed negative in the amount of USD 12.7 million against positive value in the amount of USD 16.0 million in 2016. The main factor that affected the change in the balance of business services in the reporting period was the growth in the imports of the consultation services.

INCOME

Dynamics of the item "income" in the reporting period was defined mainly by the change in the volume of direct investment income.

According to the results of January-September 2017, the balance of the item "income" was found negative in the amount of USD 213.5 million, which is by 9.9 percent higher than the similar indicator

According to the results of nine months of 2017, the turnover of international services increased slightly and constituted USD 1,266.2 million.

According to the results of January-September 2017, **balance of international services** was negative and constituted USD 2.0 million against negative balance in the amount of USD 126.8 million in the corresponding period of 2016. At the same time, there was a decrease in the import of services by 16.0 percent, whereas the volume of services provided by the residents of the Kyrgyz Republic to non-residents increased by 0.6 percent.

In the reporting period the **export of services** constituted USD 632.1 million, which corresponds to 49.7 percent of export of goods. **Import of services** was in the amount of USD 634.1 million, which constituted 20.8 percent of import of goods.

In January-September 2017, the main services were travels, transport and business services, which in total constituted 84.2 percent of the turnover of international services.

According to the results of nine months of 2017, the balance of the item "travels" was found positive and amounted to USD 119.3 million against USD 3.6 million in the same period of 2016.

of 2016. This tendency is mainly a result of decrease in the volume of distributed income from USD 133.6 to USD 7.7 million. Volume of re-invested income of the resident-entities increased from USD 46.0 to 139.2 million.

In the reporting period, the volume of interest payments on the previously received loans increased by 9.4 percent and amounted to USD 58.8 million. As a result, deficit on the item "incomes on other investments" increased by 10.9 percent (up to USD 49.8 million).

TRANSFERS

Inflow on the item "current transfers" increased, which has become the result of increase in the net inflow of remittances of labor migrants.

Positive balance of **current transfers** according to nine months of 2017 constituted USD 1,758.4 million having increased as compared to the similar period of 2016 by 26.0 percent. **Private transfers** (other sectors) made the main impact on the current transfer account.

In the structure of private transfers, as before, the money transfers of migrant workers have the main value, the specific weight of which in the gross volume of private transfers constitute 96.6 percent. In the reporting period, increase in the net inflow of money transfers was due to the rise in the gross inflow by 25.5 percent, meanwhile, the outflow of money transfers increased by 22.5 percent.

* According to NBKR data including estimates

¹ Remittances exceeding USD 3000 are not taken into account

² Additional estimation coefficient of 10% is used for assessing remittances which migrants inflow in cash

Chart 5. Balance of remittances and export
(in percent of GDP)

Money transfer systems⁶ remain the main mode of the labor migrants' remittances to the country. In January-September 2017, the volume of funds received through money transfer systems constituted USD 1,839.8 million⁷, which is by 25.5 percent higher than the similar indicator of 2016. The geographic structure of money transfers remains almost unchanged. According to the results of the reporting period, the main share of money transfers was received from the Russian Federation (98.1 percent).

⁶ Anelik, Blizko, Contact, Migom, MoneyGram, Western Union, Unistream, Zolotaya Korona, Leader, Bystraya Pochta (Fast Post), Allure and other money transfer systems and remittances via Kyrgyzpochtasy Public Enterprise.

⁷ Excluding the NBKR additional estimates.

In the structure of transfers made from the Kyrgyz Republic, the prevailing specific weight also falls on the Russian Federation (98.7 percent).

Remittances remain the main source of financing of trade deficit. The balance of remittances still covers net export of consumer goods, which in turn was formed with a negative value of USD 965.3 million.

According to the results of nine months of 2017, the balance of current transfers in the **sector of state governance** increased and was formed positive in the amount of USD 59.9 million. Increase in inflows of official transfers was due to the growth in the volume of grants received by the state sector.

CAPITAL AND FINANCIAL TRANSACTIONS ACCOUNT

In the reporting period, the reduction in the positive capital and financial account was due to decline in the net inflow on direct and other investments.

Chart 6. Capital and Financial Account

(in percent of GDP)

According to the results of nine months of 2017, **the capital and financial account** was formed with a positive balance in the amount of USD 102.8 million, against a positive balance in the amount of USD 517.1 million in the similar period of 2016.

The balance of **the capital account** was formed positive in the amount of USD 105.5 million, which is by 18.2 percent higher than the level achieved in the similar period of 2016.

Financial account according to the results of January-September 2017 was formed with a negative balance in the amount of USD 2.7 million, meanwhile in January-

September 2016; it was formed with a positive balance in the amount of USD 427.8 million. The financial account experienced major impact of reduced inflow of capital on the items "direct investments" and "other investments".

Balance of the item **"direct investments"** was formed positive and constituted USD 127.5 million⁸, having decreased by 62.2 percent compared to the indicator according to the results of nine months of 2016. The decrease was mainly due to a reduction in the net inflow of equity investments.

According to the results of nine months of 2017, the balance of the item **"other investments"** was formed negative in the amount of USD 107.1 million. Negative balance of this item was formed under the influence of an increase in the residents' foreign assets.

In January-September 2017, the assets of the residents increased by USD 167.7 million. In the reporting period, other assets of the residents increased by USD 283.3 million, meanwhile in the similar period of 2016, these assets decreased by USD 162.5 million. The accounts receivable of the non-residents to the residents of the Kyrgyz Republic increased up to USD 130.1 million.

As of the end of September 2017, in total, more than 90.0 percent of the gross volume of accounts receivable fell on the enterprises that provide supply of electricity and gas, engaged in processing industry, as well as the enterprises of the wholesale and retail trade and the organizations that deal with the professional, scientific and technical activity.

Moreover, the funds of the resident entities on the accounts abroad decreased by USD 227.6 million for nine months of the reporting year.

⁸ Including the NBKR estimates.

According to the results of January-September 2017, the liabilities to the non-residents increased by USD 60.7 million mainly due to the growth debt service obligations. Thus, the net inflow of loans to the state sector increased by 3.5 percent compared to the similar period of 2016 and amounted to USD 129.3 million. Moreover, the net volume of loans received by the private sector in the reporting period decreased by 40.2 percent and amounted to USD 79.5 million due to a decrease in the volume of received loans and payments on the principal amount of previously received loans. As a result, the net inflow of loans in the reporting period was formed positive in the amount of USD 49.7 million.

In the reporting period, the volume of accounts payable of resident entities increased by USD 31.0 million against decrease in the amount of USD 10.1 million in January-September 2016. In general, the prevailing specific weight in the total volume of accounts payable fell on the enterprises of mining and processing industry, the organizations that deal with wholesale and retail trade. These sectors constitute approximately 70 percent of total loan debts.

According to the results of nine months of 2017, **the overall net balance of payments** was formed positive in the amount of USD 97.8 million.

The balance of the item "**Errors and omissions**", taking into account the additional estimates of the National Bank of the Kyrgyz Republic, was formed positive in the amount of USD 223.7 million. The volume of the international reserve assets⁹ as of September 30, 2017 constituted USD 1,921.3 million, which covers 4.4¹⁰ months of the future import of goods and services.

⁹ In accordance with the IMF methodology, the international reserve assets comprise the assets only in convertible currencies.

¹⁰ For reference: the volume of gross international reserves covers 4.8 months of future imports of goods and services.

Transfer to methodology according to the 6th Edition of the Balance of Payments and International Investment Position Manual

Currently, the balance of payments statistics is compiled by the National Bank of the Kyrgyz Republic in accordance with the requirements of the International Monetary Fund's Balance of Payments Manual, the fifth edition (hereinafter referred to as the BPM5). However, in order to provide compliance of the external sector statistics methodology with the new international standards, the National Bank takes measures on compiling the balance of payments statistics based on the IMF's new methodology – the Balance of Payments Manual, the sixth edition (hereinafter referred to as the BPM6).

This box provides the users with the balance of payments of the Kyrgyz Republic (analytical form), as well as international investment position of the Kyrgyz Republic compiled on the basis of the BPM6 methodology.

Given that the BPM6 has a high degree of continuity with the methodology of the BPM5, the balance of payments statistics which are based on the new methodology generally remain comparable with the data compiled according the methodology of the BPM5. At the same time, the meaning of the balance of payments accounts changed as some items of the balance of payments were regrouped in accordance with the BPM6.

The main changes in the accounting system for transactions in the BPM6 as compared to the BPM5 are given in Table 1.

Table 1. Transactions Recorded in the Balance of Payments

	BPM5	BPM6
Basic items	1.Current account -Goods and services -Income -Current transfers 2.Capital and financial account -Capital account -Financial account	1.Current account -Goods and services -Primary income -Secondary income 2.Capital account 3.Financial account

	Balance calculation	Final balance of the financial account = change in assets + change in liabilities		Net lending (+)/net borrowing (-) = change in assets – change in liabilities	

List of Amendments in Accounts of the Balance of Payments of the Kyrgyz Republic according to the BPM6 methodology

Goods

According to the BPM6 methodological requirements, the item "Goods" underwent significant changes, which affected the form of this account's presentation, regrouping of items and differentiation of individual goods due to their special role in the financial markets. Thus, the following components are recommended to be reflected in the item "Goods": *export/import of goods according the balance of payments methodology, net exports of goods under merchanting, non-monetary gold.*

In adapting the balance of goods of the balance of payments of the Kyrgyz Republic with the requirements of the BPM6, the following amendments were made:

- export/import of goods and non-monetary gold are introduced as the main components;
- re-export is defined separately as an additional item in the export of goods;
- goods procured in ports by carriers are included in the item of export/import of goods, meanwhile, according to the BPM5 such goods were defined as a separate item under goods;
- migrants' personal effects are not included in the item of export/import of goods and are not reflected in any other balance of payments accounts, as according to a new interpretation, this concept is not classified as an operation;
- goods acquired to be processed, goods sent abroad for repair are excluded from the item "Goods", because there is no transfer of ownership for the goods between a resident and a non-resident in accordance with the BPM6 methodology.

Services

Significant amendments were not introduced in the general concept of accounting the international services in the balance of payments. The main adjustments according to the new BPM6 include clarification in the procedure and methodology of accounting for several indicators, as well as rearrangement or renaming of the sections and particular items on services account to bring the services account in line with the conceptual framework of the System of National Accounts (SNA 2008) and the Manual on Statistics of International Trade in Services (UN, 2011).

The following adjustments on the service account of the balance of payments of the Kyrgyz Republic were made in order to bring it in line with the BPM6 methodology:

- a new item "Manufacturing services on physical inputs owned by others", which includes only the fee charged by an entity that does not own the goods and engaged in the processing of material resources, was introduced in the section of services;
- postal and courier services (previously recorded in the item "Communication services") are included in the item "Transport services";
- the item "Construction services" was renamed in "Construction", which mainly reflects the fact that the construction works, as well as the goods and services purchased by a non-resident enterprise that is building in the country where construction activities are carried out, are accounted in this item. The construction is divided into "construction abroad" and "construction in the Kyrgyz Republic";
- the item "Royalties and license payments" (previously reflected in the item "Business services"), according to the BPM6 methodology was renamed and represents a separate item entitled "Charges for the use of intellectual property, not classified in other categories";
- a new item, that combines telecommunication services (previously recorded in the item "Communication services") with computer and information services, which previously represented a separate item, was introduced.

Primary income

To ensure consistency between the accounts of foreign economic activity and the national accounts, the item "Income" and its components are brought into line with the item "Primary income account" of the SNA 2008. A detailed breakdown of the investment income is introduced; this breakdown allows linking it with the functional and instrumental classifications of the financial instruments. At the same time, generally, the indicators of the item remain comparable with the data compiled using the BPM5 methodology.

Secondary income

In general, the conceptual framework for accounting current transfers in the balance of payments did not change significantly and maintained continuity with the BPM5 methodology. According to the BPM6 methodological requirements, the item "Current transfers" was renamed into "Secondary income". More detailed classification of the types of current transfers is provided; certain definitions and procedures of accounting for particular sub-items of the secondary income account are clarified and distinguished.

Financial account

Generally, the basic principles for compiling a financial account according to the BPM6 did not change. The new methodology clarifies the concepts of direct investment, which were brought in line with the fourth edition of the "OECD Benchmark Definition of Foreign Direct Investment". In particular, the definitions of control and influence, the recording methods of the investment chains and fellow enterprises, as well as presentation of assets and liabilities on the gross basis and in accordance with the principle of direction were revised. Functional and instrumental categories of the financial account were expanded and supplemented.

In the course of bringing in compliance with the BPM6 requirements, the following amendments were introduced into the financial account of the balance of payments of the Kyrgyz Republic (except for the amendments related to the column names and the interpretation of signs related to the financial account reflected in Table 1):

- name of the item "Reinvested instruments" in direct investments, according to the BPM6 methodology, was renamed to "Reinvestment of earnings", in order to separate it from the corresponding item on the primary income account;
- credits provided directly to the suppliers of goods and services, as well as advances and prepayments to the customer for goods and services accounted in the item "Accounts receivable and payable" according to the BPM5, are included in the item "Trade credit and advances". Moreover, other debts that are not classified as trade credits and advances or other instruments of the financial account are included in the item "other accounts payable/ receivable";
- other equity instruments not classified as direct investments are included in "other investments" as a separate item;
- liabilities in arrears is still reflected in the original instrument until liquidation of obligation, meanwhile, according to the BPM5, the old liability was assumed to have been repaid and a new one was created instead and that such contingent transaction was reflected in the item "Other assets/other liabilities".

In addition to the amendments mentioned above, the National Bank will continue to work on further clarifying and improving the statistical recording of the balance of payments accounts in accordance with the BPM6 methodological requirements.

Table II.1. Sources of Information Used by the National Bank for Compilation of the Balance of Payments of the Kyrgyz Republic

Items of the Balance of Payments	Sources of information	Contents of information
Current account		
Commodities		
Export of goods (FOB)		
export	NSC	
commodities purchased in ports	NSC	
nonmonetary gold	NSC	
Import of goods (FOB)		
import (CIF)	NSC	
value adjustment	NSC	NSC estimate of the share of transport and insurance services in import at CIF prices on the basis of survey of enterprises
commodities purchased in ports	NSC	data on import of bunker fuel based on reports of enterprises according to form 1-services
Services		
Transportation services	NSC, CB	estimates NSC of the share of transportation costs in import at CIF on the basis of inspection of the enterprises
Travels	NSC	estimate in compliance with the methodology based on the number of residents arriving (leaving) in the Republic (from the Republic)
Communication services	NSC, MTC	
Construction	CB	
Insurance services	NSC, enterprises, CB	NBKR assessment by the share of costs in import at CIF prices on the basis of surveys of enterprises; data from enterprises and banking statistics
Financial services	NBKR, CB	
Computer and information	CB	
Government services	MFA, CB	data on maintenance expenses of the KR representative offices abroad; data on expenses of foreign representative offices in the KR
Business services	NSC, CB, enterprises	data on other business technical services, collected from enterprises according to reporting form 8VES-services; data from some large enterprises
including technical assistance	IMF, MF	the estimated data
Other services	NSC, CB	data on other services collected from enterprises according to reporting form 8 VES-services; data on other services from banking statistics
Income		
Employee compensation	NSC, CB, enterprises	
Income on investment		
Income on direct investment	NSC, CB	data on direct investment income collected from joint ventures and foreign enterprises according to reporting form 1-SP; data from banking statistics on direct investment income
Income on portfolio investment	NBKR, CB	
Other investment income		
Interest on loans		
Monetary authorities	NBKR	
General government	MF, NBKR	
Banks	CB	
Other sectors	NSC	
Other investment income	NBKR, CB	data on profit and expenses of the NBKR, relating to international reserve management; incomes of CB from abroad assets and liabilities

Table II.2. (continued)

Items of the Balance of Payments	Sources of information	Contents of information
Current transfers		
Humanitarian aid	NSC, enterprises	
Technical assistance	IMF	the estimated data
Other grants	NBKR	
Contributions to international	MF	
Workers' remittances	MTC, CB, NBKR	
Current and financial account		
Capital transfers		
Commodity grants	NSC	estimate of the share of capital goods in the total volume of commodity grants
Migration related transfers	NSC	NBKR estimate of migrants' transfers based on NSC data on the number of arriving and departing migrants
Debt forgiveness	Enterprises, MF	
Direct investment		
Abroad		
To the Kyrgyz Republic	NSC	data on direct investment collected from joint ventures and foreign enterprises according to reporting form 1-SP; data from banking statistics on direct investment into the banking sector; data of some large joint ventures
Portfolio investment		
Promissory notes	NSC, CB NSC, NBKR, CB, FMSRS KR	
Financial derivative
