### ***Balance of Payments of the Kyrgyz Republic***

The Balance of Payments of the Kyrgyz Republic is prepared by the National Bank of the Kyrgyz Republic. The periodical describes recent developments in the external sector and contains statistical data on the balance of payments, foreign trade, international reserves, external debt and an international investment position of the Kyrgyz Republic, as well as a technique and a database to compile the balance of payments. This periodical is issued four times a year - in January, May, July, and October. It is published in three languages: Kyrgyz, Russian, and English.

The latest data update for this publication: January 15, 2006.

#### **Conventional Symbols and Notes:**

- ... No data available;
- Indicators are equal to 0 (zero) or are insignificant;
- The period between years and months (for instance, 1994 to 1996 or January to June) means that all years and months between the indicated marginal dates are covered herein.

Due to rounding, figures might not coincide in the final category of summation.

Due to a contingent change in the accounting technique or historical data used in this periodical the earlier published data could be revised, therefore, the period of 5 years is considered to be "open".

The Press Release of the NBKR contains a chronicle of events in the National Bank and the basic data on the financial market. It is published on the weekly basis in Kyrgyz and Russian.

The NBKR publications are disseminated in accordance with lists approved with orders of the Chairman of the National Bank of the Kyrgyz Republic and are placed on its Website at the following address: <http://www.nbkr.kg>.

---

Herewith, the National Bank of the Kyrgyz Republic is directing attention to the following change. For the purposes of compiling the data on gross reserves and reserve assets with the relevant data according to the international standards of their dissemination, the gross reserves in months of import and the reserve assets in months of import were recalculated for the period since 1993 including to 9 months of 2005 due to the change in the technique of calculating the gross reserves in months of import. The indicator "reserves in months of import" in this publication is derived as the ratio of the value of reserves to the months of import of the next year.

### Balance of Payments for 9 months of 2005

The balance of payments for 9 months of 2005 was characterized by significant developments in the balance of trade accompanied with a reduction of a surplus in financial transactions.

### Current Account

The current account in the balance of payments of the Kyrgyz Republic for 9 months of 2005 turned out to be unbalanced by about US\$ 124.0 million, that is 1.9 times larger than the current account deficit in the similar period of 2004 and equivalent to 6.9 percent of GDP. Export of goods and services decreased by 0.4 percent, while import increased by 22.9 percent.

**Chart 1: Current account**

in percent of GDP

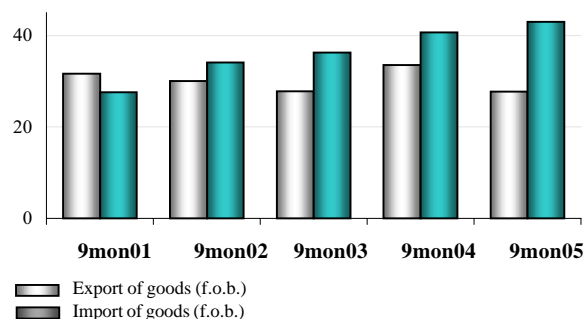

### Trade Balance

The foreign-trade turnover of the Kyrgyz Republic for 9 months of 2005 grew by 8.2 percent relative to the comparable period of 2004 and amounted to US\$ 1269.5 million. Growth of the volume of commodity flows was due to growth of import, whereas rates of growth of export of goods slowed down.

**Chart 2: KR Trade Balance**

in percent of GDP

A gap between export and import determined the **trade gap** of US\$ 276.9 million, which is 15.5 percent of GDP.

Having decreased by 6.4 percent as compared to export for the corresponding period of the previous year, **export of goods** at f.o.b. prices totaled US\$ 496.3 million for 9 months of 2005.

Export decreased due to mainly the reduction of export to non-CIS countries by 17.2 percent, both in such an item as gold and in other items of export. In terms of value and compared to the similar period of the previous year, export of gold decreased by 17.4 percent, and by 23 percent - in kind. In general, excluding gold and electricity, the volume of export of other types of goods increased by 12.8 percent and totaled US\$ 296.7 million, being conditioned by the larger volume of deliveries of such goods, as cement, spare parts and vehicle equipment, cotton and wool.

**Table 1: Export of goods**  
(millions of US dollars)

	9mon01	9mon02	9mon03	9mon04	9mon05
Export (f. o. b)	357,0	358,6	378,8	530,2	496,3
Change, in %	-8,0	0,4	5,6	40,0	-6,4
CIS	139,3	117,3	127,1	190,0	214,5
Change, in %	-19,8	-15,8	8,4	49,5	12,9
non-CIS	217,7	241,3	251,7	340,2	281,8
Change, in %	1,5	10,8	4,3	35,2	-17,2

Growth of the volume of export was noted in the reporting period with respect to the investment goods, energy products and consumer goods - by 13.8 percent, 6.8 percent and 8.0 percent, correspondingly. At the same time, export of primary products was registered to have decreased by 19.8 percent, while growth of producers' goods - by 13.2 percent.

Growth of export of investment goods was determined by mainly the increase in export of machines and equipment for civil construction and contractual works, parts and accessories of vehicles, special vehicles, electric accumulators, and electric transformers.

The share of export to the non-CIS countries decreased as compared to the corresponding period of the previous year by 7.4 percentage points and made 56.8 percent. As before, the United Arab Emirates (59.4 percent of national export to the non-CIS countries), Switzerland (10.2 percent), China (7.4

percent) and Canada (6.8 percent) were the most significant partners among the non-CIS countries. Basic exports to these countries, excluding gold, were those of jet fuel, cotton, gasoline, and aluminum.

The share of CIS countries in the total of export deliveries increased from 35.8 to 43.2 percent. Among the CIS countries, the share of export to Kazakhstan increased significantly (from 34.2 to 41.4 percent). The reason for growth of export to Kazakhstan was that of growth of deliveries of electricity, cement, glass, and slate. The share of export to Russia (42.0 percent) is still very large. Export to Tajikistan and Uzbekistan was 6.4 и 5.2 percent, correspondingly.

**Import of goods** at f.o.b. prices in the reporting period totaled US\$ 773.2 million and it is by 20.3 percent more than import in the corresponding period of 2004.

**Table 2: Import of goods**  
(millions of US dollars)

	9mon01	9mon02	9mon03	9mon04	9mon05
Import (f. o. b)	310,9	407,6	493,8	642,7	773,2
Change, in %	-12,4	31,1	21,2	30,1	20,3
CIS	170,0	220,1	266,7	385,9	445,6
Change, in %	-10,9	29,4	21,2	44,7	15,5
non-CIS	140,8	187,5	227,1	256,8	327,6
Change, in %	-14,1	33,1	21,1	13,1	27,6

Import from the CIS countries increased by 15.5 percent and from the non-CIS countries - by 27.6 percent. Import of petroleum products increased essentially (by 31.7 percent) - due to a rise of prices. At the same time, the physical deliveries of petroleum products dropped by 5.4 percent.

According to the functional structure, growth of import fell on such groups of goods as energy products, investment products, producers' goods and consumer products. Due to growth of import of petroleum products, import of energy products increased by 26.0 percent. Growth of import of investment goods by 17.6 percent was caused by increased import of machines and equipment, their parts, machine tools, electric accumulators, special vehicles, instruments and tools. Growth of import of consumer goods (by 10.6 percent) was due to the increase in the deliveries of medicaments, pharmaceutical products, leather products, garments and detergents to the republic.

The share of import from the CIS countries in the geographical structure increased from 60.5 to 61.4 percent, while the share of non-CIS countries decreased from 39.5 to 38.5 percent. Particularly significant was growth of import from Russia (by 30.8 percent), Ukraine (83.8 percent), and Belarus (92.6

percent). At the same time, import of goods from Kazakhstan decreased by 17.5 percent due to, mainly, the reduction of deliveries of petroleum products. As ever, China (19.9 percent of import from the non-CIS countries), USA (17.3 percent) and Germany (10.2 percent) were the basic partners in import from the non-CIS countries.

### Balance of International Services

The balance of international services for 9 months of 2005 developed with the deficit of US\$ 37.9 million.

**Table 3: Balance of services**  
(millions of US dollars)

	9mon01	9mon02	9mon03	9mon04	9mon05
Export	59,8	101,8	108,1	149,5	180,5
Change, in %	30,3	70,2	6,2	38,3	20,7
Import	-93,6	-104,5	-107,2	-164,2	-218,4
Change, in %	-16,3	11,6	2,7	53,1	33,0

Proceeding from the outcome of the reporting period, export of services totaled US\$ 180.5 million and it is by 20.7 percent higher than the similar indicator of 2004. Growth of the volume of export of services is related to growth of transport, construction and business services rendered to nonresidents. One of the basic items of export of international services "Transportation Services" amounted to US\$ 47.5 million, showing the 24.4 percent increase as compared to the base period. Trips showed the insignificant reduction of export of tourist services - by 5.5 percent. Export of construction services grew 3.5 times, particularly, to the non-CIS countries. The business services showed an upward tendency, for 9 months of 2005 their volume increased by US\$ 12.1 million or by 46.5 percent.

The nonresidents rendered services totaling US\$ 218.4 million and it is by 33.0 percent more as compared to the base period. Growth of import of international services is connected with the increase in almost all of its items. Import of transportation services in the reporting period increased by 45.9 percent and totaled US\$ 89.6 million. The trips and transportation services made in the aggregate 60.6 percent of import. Significant growth could be noted in the business and other services. The business services rendered to the nonresidents and other services totaled US\$ 21.1 million and US\$ 17.8 million, correspondingly, thereby showing the increase by 22.7 percent in the first case and the 3.8 times increase in the second case, as compared to the base period. It was due to growth of import of consultative services, and the services in the area of health and other types of services.

## Balance of Income

The deficit of the **balance of income** for 9 months of 2005 amounted to US\$ 63.6 million, having thus decreased by 11.7 percent as compared to the similar period in the previous year. The reason for the deficit of this account was that of the considerable reduction of payments to the nonresidents on income from direct investment (by 39.7 percent). At the same time, other investment showed the increase in the deficit from US\$ 17.2 to US\$ 22.9 million, which fact could be explained by growth of interest payments on the earlier loans.

The negative balance of the account "Compensation of Labor" increased by 48.2 percent and totaled US\$ 12.9 million.

## Balance of Current Transfers

Proceeding from performance for 9 months of 2005, the current transfers to the republic totaled US\$ 254.3 million against US\$ 133.8 million in the base period, thereby indicating the increase by 90 percent. Growth was noted in both the official and private transfers. The largest share in the structure of current transfers falls on the private transfers (92.5 percent). In the reporting period, a net inflow of private transfers amounted to US\$ 235.3 million and it is by 90.5 percent more than in 2004. The volume of official transfers was US\$ 19.1 million, of which US\$ 9.7 million came as commodity grants and US\$ 11 million - as grants in cash. It should be noted that the inflow of commodity grants decreased by 16.9 percent.

## Capital and Financial Account

The data for 9 month of 2005 indicates that the capital and financial account (in the analytic format of presentation of the balance of payments) developed with the surplus of US\$ 38.7 million, being thus almost twice less than the corresponding indicator of 2004.

At the same time, as compared to the comparable period of the previous year, the **capital account** deficit for the reporting period increased 2.2 times and totaled US\$ 26.7 million. It was conditioned by a net outflow of transfers of migrants.

The surplus in the **financial account** amounted to US\$ 65.4 million for 9 months of 2005 and it is by 30.3 percent lower than the indicator of the corresponding period of 2004.

The net inflow of **direct investment** decreased 2.9 times and totaled US\$ 46.9 million. This reduction, as compared to 2004, could be explained by the inflow of sales proceeds of shares in a foreign company in the corresponding period of the past year. The net inflow of funds invested in stock capital amounted to US\$ 12.9 million. The inflow of capital on reinvested income was equal to US\$ 25.5 million, having thus decreased 1.7 times as compared to the base period. Direct investment as "Other Capital" containing the transactions with bonds was in surplus of US\$ 8.5 million and it could be explained by an excess of counterpart capital over the payments on liabilities.

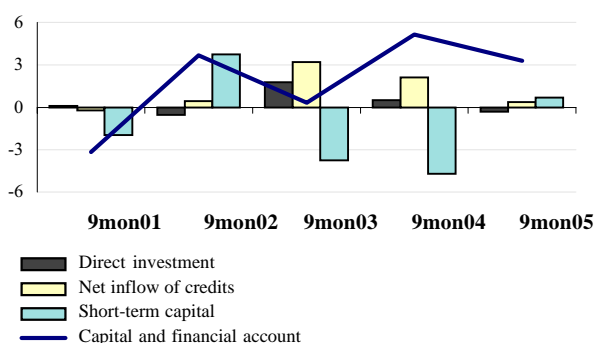

The net outflow of **portfolio investment** for the reporting period amounted to US\$ 5.6 million, unlike the base period, when the inflow of portfolio investment was registered as totaling US\$ 8.1 million. This change in the inflows was due to the reduction of liabilities, that is, by the reduction of investment in capital of enterprises by portfolio investors and, on the other hand, by the increase in assets of Kyrgyz banks as debt instruments.

The balance of **other investment** for 9 months of 2005 was in surplus of US\$ 24.2 million as against its deficit of US\$ 28.4 million. This change was due to the significant increase in the liabilities of residents of the Kyrgyz Republic.

The net inflow of capital on foreign liabilities grew 2.3 times and amounted to US\$ 89.8 million. The decisive role in formation of this item was that of the capital flows. For instance, the turnovers under the item "Deposits and Foreign Currency in Cash" increased as a result active intermediary transactions of.

**Chart 3: Capital and Financial Account**

in percent of GDP

The flows on long-term liabilities decreased, on the contrary, in the total volume: the general government liabilities under the item "Loans" decreased by US\$ 37.4 million, while the private sector liabilities increased by US\$ 11 million.

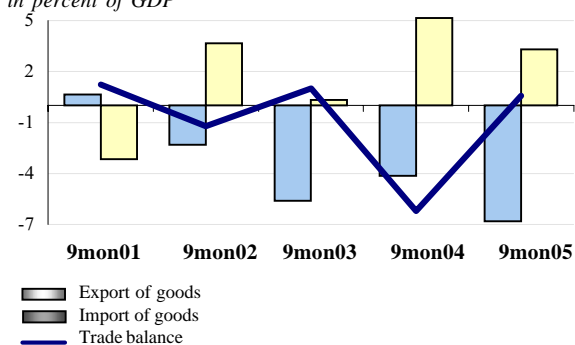

In addition, the residents' accounts payable for 9 months of 2005 increased 2.7 times and made US\$ 19.8 million.

For January to September 2005 the foreign assets of residents underwent insignificant changes as compared to the base period and developed with the surplus of US\$ 65.7 million - it is by 3.0 percent more than the corresponding indicator of 2004.

The item "**Errors and Omissions**" developed with the surplus for nine months of 2005 and amounted to US\$ 75.2 million.

**Chart 4: The balance of services**

*in percent of GDP*

Thus, the balance of payments Kyrgyz Republic for January to September 2005 developed with the deficit of US\$ 10.1 million. At the same time, the volume of international reserves increased by 11.4 percent and totaled US\$ 573.8 million at the end of the reporting period, thereby covering 5.2 months of import of goods and services.

Note:

Long-term investments are investments in financial assets, whose initial maturity was set up, in compliance with a contract, as more than one year or has never been stipulated.

Short-term investments are investments in financial assets, with maturity of one year or less than one year, pursuant to a contract, or paid as short notice.
