Balance of Payments of the Kyrgyz Republic

«Balance of payments of the Kyrgyz Republic» is issued by the National Bank of the Kyrgyz Republic. The legislative basis for the balance of payments are the Law of the Kyrgyz Republic as of July 29, 1997 No. 59 “On the National Bank of the Kyrgyz Republic” and the Resolution of the Government of the Kyrgyz Republic as of November 3, 2000 No. 645 “On measures to improve statistics of the balance of payments of the Kyrgyz Republic”. This document reflects last tendencies in external sector development and shows statistical data on the balance of payments, external trade, international reserves, external debt and international investment position, as well as construction methods of balance of payments and informational database. This document is published 4 times a year - in January, May, July and October and has 3 language versions: Kyrgyz, Russian and English.

This publication includes revised data in the “Services” article since 2008 due to NSC revision.

Last day for update of data for the present publication is October 20, 2013.

Annotation symbols and notes:

- ... means the absence of data;
- means, that indicators/ratios are equal to 0 (zero) or insignificant;
- is set between years or months (e.g., 1994-1996 or January-June) and means, that all years and months are covered by the shown dates.

Deviations in last digits may occur because of rounding numbers when summing up.

In regard with the possible changes in accounting methods or historical data, which are used in the given document, correction of earlier published data is acceptable. Therefore, 10 years period can be accounted as «open period».

THE CURRENT STATUS OF THE BALANCE OF PAYMENT

Chart 1: Current Account

in percent of GDP

The deterioration in the status of the balance of trade and income resulted in increase of the current account deficit to USD 949.7 million (24.7 percent to GDP) in the first half of 2013, despite the remaining growth rate of cash inflows under “current transfers” article and decrease of the negative balance of services.

The current account negative balance was partially financed by net capital inflow

on the capital transactions account and financial operations in the amount of USD 502.4 million.

According to the estimates of the National Bank, current account deficit taking into account the additional estimates of NBKR on reexport of oil-products and export of services achieved USD 521.5 million (15.6 percent to GDP).

TRADE BALANCE

In the first six months of 2013, **the trade balance** of the Kyrgyz Republic has been formed with a negative balance and amounted to USD 1 606.4 million, which is by 23.7 percent higher compared to the corresponding period of 2012.

The main reasons for deterioration in the trade balance are the following factors:

a) decline in the export of textile, agriculture and metallurgical production;

b) growth in the import of petroleum products.

The external trade turnover in FOB prices in the reporting period increased by 7.5 percent and amounted to USD 3 272.8 million.

Export of goods in FOB prices including additional estimates of the NSC and the NBKR constituted USD 833.2 million, having decreased by 4.6 percent as compared to the corresponding index in the first six months of 2012. Export of goods excluding additional estimates in FOB prices constituted USD 655.5 million.

Export, excluding gold, constituted USD 456.0 million¹, having decreased by 5.9 percent, compared to the corresponding index of January-June 2012. In

the reporting period, change in price and physical volume of nine largest goods, the share thereof constituted 37.7 percent of export excluding gold, had a significant impact on the dynamics of export excluding gold (see Table 1).

Significant decrease in the cost fell under “clothes and accessories” (decrease by 35.7 percent).

¹ In FOB prices, excluding additional estimates of the NBKR and the NSC; in the first half of 2013, export, excluding gold with additional estimates of the NBKR and the NSC constituted USD 633.7

¹ Export of on-bord stock

The most part of the country's export in the Kyrgyz Republic is the products of **processing industry** (metallurgical, textile and garment industry) and **agriculture**.

Decrease of average contractual prices by 6.7 percent² in the reporting period led to the reduction of export of gold by 5.4 percent in terms of value. The physical volume of export of gold is increased by 1.4 percent. Nevertheless, export of gold is in the leading position (86.5 percent of the overall production) in the export of goods of **metallurgical production**.

Growth in the volume of supplies was observed in terms of other goods of metallurgical production except for waste metal and wastes of iron industry.

Table 2: Export of major products of metallurgical production*

² In January-June 2013 the average world price for 1 gold ounce amounted to USD 1 524.3 which is by 7.7 percent lower than that of the corresponding year of 2012; Source: Reuters

In the first six months of 2013, there was decrease of production³ output and export of certain products of textile and garment industry due to change in the rules of goods' import to the territory of the Kyrgyz Republic⁴ and decline in demand for products of garment industry in the foreign market. In particular, the export of articles of apparel and clothing accessories constituted USD 51.7 million, which is by 35.7 percent lower than the level achieved in the first half of 2012. The largest decline of export in this sector was observed in the "women's and girls' apparels of textile fabrics" article, the volume thereof decreased by 34.2 percent or USD 19.0 million. Decrease of the export of this goods was reasoned by the reduction of the contractual prices and physical volume of supplies (by 29.4 and 6.7 percent accordingly).

The export volume of other products of garment industry, except for textile and knitted items for men, also decreased. It should be noted that the decrease in the physical volume of supplies of the indicated products was accompanied by the decrease in the average export prices.

* in FOB prices, excluding estimates of NBKR and NSC

According to the results of the first half of 2013, real growth of agricultural output constituted 1.9 percent⁵, which is mainly reasoned by the growth of the products of animal origin. Thus, in the reporting period, the export of living animals increased by 42.9 percent (or by USD 1.7

³ According to the NSC, in January-June 2013, textile and garment industry output decreased by 22.1 percent

⁴ According to the Decree of the Government of the Kyrgyz Republic "On introducing amendments to some resolutions of the Government of KR" №573 as of August 17, 2012, the unified rate of the customs fees and taxes in the import of certain types of goods by land transport was increased from 0.15 to 0.35 USD per 1 kg.

⁵ "Social and economic situation in the Kyrgyz Republic (January-March 2013)", NSC

million), meat and meat products by 69.5 percent (or by USD 1.2 million). It should be mentioned that growth in the supplies of aforementioned goods was provided by increase in their physical volume and export prices. Moreover, export of dairy products was almost stopped (decrease by 88.9 percent or USD 12.3 million), there was decrease in the export of cotton (by 59.2 percent or by USD 9.7 million), vegetables (by 10.8 percent or USD 4.7 million), skins and rawhide (by 30.0 percent or by USD 0.9 million) and other goods. It should be noted that decrease in the supplies on the aforementioned positions was primarily due to decline of the physical volume.

* in FOB prices, excluding estimates of NBKR and NSC

Based on the results of the first half of the current year, particular changes were observed in the geographical structure.

Insignificant reduction of the export of gold have not affected the position of Switzerland: it remain the major trade partner of the country taking the position of 29.6 percent of export. Share of Kazakhstan in the general volume of export remains stable (26.5 percent). Increase in the export of rubber tires, cast iron and steel and transport vehicles (mainly re-exported) to Uzbekistan promoted to the increase in the volume of exports from 9.5 to 13.1 percent in the reporting period. The share of the Russian Federation decreased from 17.2 to 10.1 percent which was first of all related to decrease in the supplies of clothes and accessories. In general, the Kyrgyz Republic exported goods to 79 countries of the world in the reporting period (for comparison, in the first half of 2009 export was only to 57 countries).

The geographical distribution of the exported goods indicated that, excluding gold, the CIS countries are the main markets for domestic goods. High geographic concentration is evident on almost all commodities and commodity groups, primarily on gold, articles of apparel and clothing accessories, vehicles for cargo transportation and other inorganic substances, more than 90.0 percent of their supplies are carried out to one country. The consequence thereof may be the dependence of foreign trade of the Kyrgyz Republic on domestic production of separate kinds of goods, the economic situation in the country and trade policies of individual trade partner countries.

Turnover of goods in the Kyrgyz Republic with the Customs Union countries

In the general goods turnover of the Kyrgyz Republic, Customs Union countries take a significant share: in the first half of 2013 these countries made up 46.3 percent of import and 37.7 percent of export. Moreover, if the share of the Customs Union countries in the general share of import in the corresponding periods of the last five years remained stable (average 46.6 percent), then, the trend of increasing the share of the goods exported from the Customs Union countries is quite vivid.

Table I.Turnover of goods with the CU countries *

(in millions of US dollars)

	I h/y 9	I h/y 10	I h/y 11	I h/y 12	I h/y 13

Belarus	17,8	25,8	47,5	56,3	63,1

* Export in FOB prices, excluding estimates of NBKR and NSC

The main export positions to the Customs Union countries are formed from various ready items (clothes), food (vegetables, fruits), chemicals, mineral fuel (aviation kerosine¹) and other goods. The Customs Union countries provide mainly lubricants, food (wheat, mangcorn, flour, products that contain cocoa, sugar, products from cereals, flour and starch), various chemicals (drugs, essential oil), vehicles and transportation equipment.

¹ Export of board spare parts

Import of goods in FOB prices, according to the results of the half of 2013, increased by 12.4 percent and amounted to USD 2 439.6 million, having reached maximum value for the corresponding periods of the last years.

* NSC data at c.i.f. prices

In the first half of 2013, vehicles and transport equipment had the highest weight in the **goods structure** of import (24.7 percent). The volume of import of the indicated goods increased by 7.2 percent and achieved USD 651.9 million. Despite the growth of the most part of goods positions, decrease in the import of used automobiles, electric line telephone sets, automobiles for cargo transportation and other goods had a restraining effect on the growth of the cumulative import volume of the indicated group of goods.

It should be noted that separate goods of this group are partially imported for further re-export: automobiles for cargo transportation and automobiles for special purposes, spare parts and accessories, flying machine and related equipment.

* NSC data at c.i.f. prices

The weight of the group “mineral fuel, lubricants and similar materials” in the first half of the year decreased by 0.6 percentage points and constituted 21.9 percent (USD 579.4 million in total). The prevailing weight in the group is given to petroleum products.

In the reporting period, there was increase in the volume of imported petroleum products by 12.5 percent. The aforementioned growth resulted from increase in the physical volume of import by 17.8 percent compared to the corresponding indices of January-July 2012, while average export prices for imported petroleum products decreased by 4.5 percent. The main contribution to the growth of import of lubricants were made by diesel fuel and motor petrol the volume of export of which increased by 32.4 and USD 22.6 million accordingly in absolute expression.

*NSC data at c.i.f. prices

Along with the lubricants, a significant share in this group is given to natural gas and coal. Supply of the above mentioned products decreased by 4.7 and 12.4 percent accordingly in the reporting period.

The share of manufactured goods, classified by the type of material did not suffer significant changes and constituted 15.3 percent of the total volume of imported goods. More than one fourth of this group is occupied by cast iron and steel, the import thereof in the reporting quarter of 2013 increased by 27.1 percent compared to the base period. The other significant goods of this group include rubber tires, textile fabrics, various paper and metal products, wood, etc. In the reporting year, growth of cost amount was observed on almost all imported large goods of this group.

*NSC data at c.i.f. prices

There were not significant changes in the **geographic distribution** of import in the reporting year.

The country's dependence on energy carriers condition the dominant share of these goods imported from Russia (34.1 percent). Most part of the consumer goods comes from China (20.1 percent), and some types of raw materials are from Kazakhstan (9.8 percent).

Import of basic food products was generally carried out from the CIS countries. The largest groups of food products, such as cereals and their products, sugar, vegetable oils and other food products are imported from these countries. Petroleum products and some types of automobiles are also supplied from the CIS countries.

The share of non-CIS countries is more vivid in the structure of imported non-food consumer products: the aggregate share of China and Turkey in the supplies of clothing exceeded 96.0 percent, in the import of footwear – 87.0 percent. 63.8 percent of imported automobiles come from Japan, USA, Germany and China.

In general, import was carried out from 123 countries of the world in the reporting period (in the first quarter 2009 - 106 countries).

BALANCE OF INTERNATIONAL SERVICES⁷

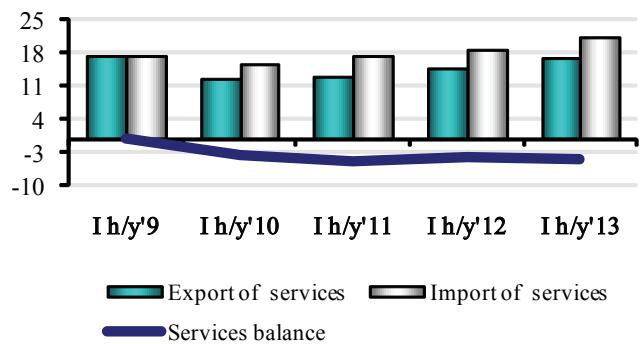

Chart 3: External service and goods trade*
(in millions of US dollars)

in the corresponding period of the last year (USD 198.8 million). At that, the outpacing growth in the exports of services (51.1 percent) was indicative compared to the increase in their import (by 21.4 percent).

In the reporting period, **export of services** reached USD 614.9 million which corresponds to 73.8 percent of percent of goods export. **Import of services** amounted to USD 735.7 million, which constituted 30.2 percent from the import of goods.

Chart 4: Balance of International services
in percent of GDP

nationals during their stay in the territory of the Kyrgyz Republic (growth by 2.6 times).

In the first half of the current year, the balance of transportation services was traditionally negative in the amount of USD 192.6 million, which is by 0.9 percent lower than it was in January –June of the last year. Moreover, decline in the turnover of transportation services was observed due to decrease in the export and import of aforementioned services. Decrease in the volume of transportation services provided by non-residents (by 4.6 percent) was primarily due to decline in the export of railway and automobile transportation services (by 56.4 and 14.8 percent accordingly). Dynamics in the import of transportation services (decrease by 2.0 percent) was defined by the services provided by automobile and aircraft transport that decreased by 14.4 and 5.7 percent accordingly.

The increased volume of foreign trade in the Kyrgyz Republic was supported by increase in the turnover of international services, which, according to the results of the first half of the current year increased by 33.3 percent, having reached the level of USD 1 350.5 million.

Balance of international services (neutral presentation of the balance of payment) developed negative and constituted USD 120.8 million, which is by 39.3 percent lower than the deficit of the balance of services

In the reporting period, the largest articles, which constituted 93.5 percent of the total turnover of international services, were travels, transportation and business services.

The balance of the “travels” article formed with a deficit in the amount of USD 50.9 million, having exceeded the level of the corresponding period of 2012 by 7.3 times. Moreover, growth was observed in the imports of services, connected with travels (growth in 2.4 times), and the services provided to foreign

⁷ Data from 2008 revised by NSC

Net export of business services constituted USD 19.5 million in the reporting period (USD 27.3 million with the negative meaning in the first half of 2012), which resulted in outpacing decrease in the import of business services (by 58.6 percent) as compared to their export (by 24.7 percent). The main factor, which influenced the decline of business services, was significant decrease of consultation services provided to the residents of the Kyrgyz Republic. Decrease in the export of aforementioned services is conditioned by decline in the export of services on land and real estate leasing as well as in the field of mining sector services.

INCOME

In January-June 2013 the balance of “income” article has traditionally formed negative and constituted USD 67.8 million which is by 2.1 times higher s compared to the corresponding index of the first half of 2012.

This trend is mainly due to increase of income of direct foreign investors from investing activity in Kyrgyzstan, which is reflected in the growth of reinvested profit of enterprises from USD 46.0 to USD 132.1 million (growth by 2.9 times). The volume of distributed income of resident companies in the form of dividends for the benefit of direct foreign investors decreased by 8.5 percent and constituted USD 8.3 million against USD 9.0 million the corresponding period of the previous year. As a result, the balance of incomes on direct investments increased by 2.6 times and achieved USD 140.4 million.

In the reporting period, there was increase in payments of interests on earlier received loan by 38.7 percent (to USD 26.7 million), primarily due to increase of payments on private loans. It contributed to increase in the deficit of “incomes from other investments” article by 41.1 percent (to USD 16.5 million).

In the reporting period, the balance of “remuneration of labor” article formed negative and constituted USD 10.9 million (decrease by 24.6 percent). This trend was conditioned by decrease in aggregate incomes of non-residents received from labor activity in the Kyrgyz Republic.

TRANSFERS

The positive balance of **current transfers** according to the results of the first half of 2013 reached another ceiling and constituted USD 945.2 million which is by 12.3 percent higher than the corresponding period of the previous year.

The core role in the current transfers account is still belongs to the **private transfers** (neutral presentation of the balance of payment), net inflow thereof increased by 12.4 percent and constituted USD 942.6 million.

Aforementioned growth was provided by inflow of workers’ remittances, which reaches 96.6 percent of the total private transfers received. Transfers under this article continue growing: net inflow of the workers’ remittances amounted to USD 905.9 million having increased by 9.4 percent as compared to the first half of 2012.

Table 12. Structure of workers remittances*

(in millions of US dollars)

	I h/y 9	I h/y 10	I h/y 11	I h/y 12	I h/y 13

of which:					
Inflows through transfer systems	392,4	495,8	732,4	862,2	984,1
Transfers of individuals through com. banks ¹	5,2	4,4	4,3	4,3	3,1
Postal populations' remittances	1,9	2,1	2,2	1,9	1,9
Estimates of NBKR ²	36,5	45,6	65,3	75,2	82,4
1.1.2 Outflow	-34,4	-46,5	-85,6	-115,9	-165,5

* excluding estimates of NBKR

¹ Remittances exceeding 3000 US dollar are not taken into account

The main channel for inflows of the workers' remittances to the republic is the transfer systems⁸. Stable tendency of increasing of the specific weight of the funds coming through the money transfer systems persists: in the first half of 2009 it constituted 90.0 percent, in January-June of the current year it achieved 91.8 percent of the gross inflow of money remittances.

Chart 5: Balance of remittances and Net Export of Consumer Goods

in percent of GDP

In the reporting period, net inflow through transfer systems increased by 9.7 percent having reached USD 822.5 million⁹. At that, the geographical structure of money transfers remains the same. According to the results of the first six months of the current year, the major share of remittances was received from the Russian Federation (97.7 percent). The share of other countries is much lower: 1.2 percent of remittances were received from

Kazakhstan, 0.7 percent – from USA. In the structure of remittances transferred from the Kyrgyz Republic, the dominant share is occupied by Russia (97.4 percent).

Remittances remain the major source of trade deficit financing. The balance of remittances still covers net export of consumer goods, which formed with a negative value in the amount of USD 723.9 million.

In the reporting period, the balance of current transfers **in the government sector** (neutral presentation of the balance of payment) remained positive in the amount of USD 2.6 million having decreased by 11.0 percent as compared to the first half of 2012. The volume of grants received by the government sector constituted USD 4.2 million having decreased by 9.9 percent. The volume of paid membership fees to international organizations decreased by 7.9 percent and constituted USD 1.5 million.

⁹ Without additional estimates of the NBKR

CAPITAL TRANSACTION ACCOUNT AND FINANCIAL ACCOUNT

According to the results of the first half of 2013, the balance of the capital account and financial account formed with a positive value in the amount of USD 502.4 million which is by 5.3 percent lower than the index of the corresponding period of 2012. At that, decrease in the capital inflow was observed on the financial account, and significant increase in the revenues on the capital account.

The balance of the capital account formed positive in the amount of USD 223.7 million which is by 5.0 times higher than the level achieved in the first half of the previous year. Significant increase in the positive balance of the capital transaction account was conditioned by the writing off the debt by the Russian Federation in the amount of USD 188.9 million in accordance

with the Agreement between the government of the Russian Federation and the Kyrgyz Republic on regulation of the debt of KR before the Russian Federation on the previously provided loans.

Financial account was formed with positive balance in the amount of USD 278.7 million in the reporting period which is by 42.6 percent lower than in the base period.

In the reporting period, net inflow of direct investment constituted USD 222.8 million, which is by 42.0 percent exceeded the

level of the corresponding period of the last year. Direct investment increased primarily due to growth in the net inflow of reinvested earnings, which increased by 2.9 times and achieved USD 132.1 million. Net inflow of funds invested into stock and other capital decreased (by 86.4 and 4.4 percent accordingly).

In the reporting period, in the section by types of economic activity the major net inflow of direct investments was observed in the operations with real estate and rent and provision of services to the customers¹⁰, as well as in the financial sector and processing industry. At that, increase was observed in the net inflow of investments in aforementioned sectors (growth in 2.0 times). Besides, investments to operations with the real estate and rent and processing industry increased by 38.8 and 14.4 percent accordingly. In the geographical structure of direct investments the major share of the capital inflow was observed from Canada, the Russian Federation, Great Britain, Cyprus and Kazakhstan.

In the year under review, the balance of portfolio investments formed with a negative value and constituted USD 1.6 million, whereas in 2012 the corresponding index was positive (USD 5.6 million).

Net volume of **other investments**, attracted to the republic in the reporting period of 2013 constituted USD 57.6 million having decreased by 82.2 percent as compared to the corresponding period of 2012.

¹⁰ According to the classification of the NSC KR, this group includes exploration works.

According to the results of the reporting period, the residents' assets increased by USD 57.3 million, whereas in the corresponding period of the last year decrease by USD 190.6 million was observed. At that, the major share of growth was provided by increase of the assets of commercial banks by USD 46.9 million. Also, increase in the accounts receivable of the residents by USD 36.6 million was observed. As of the end of the reporting period, more than 82.3 percent of the gross share of accounts receivable¹¹ fell under the processing industry, entities that implement transactions with the real estate, rent and provision of services to the consumers as well as the companies that deal with the trade and repair.

Moreover, increase in the residents' assets, placed onto their accounts in the foreign banks was observed in the reporting period (by USD 27.3 million). It should be noted that by the end of the first half of 2013 82.5 percent of the total cash balance on the accounts of the enterprises outside their national territory accounts for the enterprises of the industrial sector.

In the reporting period, liabilities on other investments to the external world increased by USD 114.9 million. Growth of liabilities was conditioned by increase in accounts payable of the residents.

In the reporting period, the accounts payable of resident enterprises increased by USD 119.3 million. Generally, the main share in the total volume of accounts payable is occupied by the enterprises operating in the sphere of trade and repair works, processing sector, transport and communication (78.0 percent of the total amount of receivables¹²).

In the reporting period, net outflow of external credits in the amount of USD 14.9 million was observed. Payments of the government sector on the principal amount of the previously received credits (USD 211.8 million) exceeded the level of received credits in reporting period (USD 186.6 million), as a result of which the net outflow of credits constituted USD 25.2 million. It should be noted that formation of the last indicator was effected first of all by writing off the debts of the Kyrgyz Republic by the Russian Federation. The volume of payments on the maintenance of the previously received credits by the private sector constituted USD 167.8 million, whereas the inflow of the credits constituted USD 178.1 million. As a result, the net inflow of credits to the private sector amounted USD 10.4 million.

According to the results of the first half of 2013, the total payment balance was positive and constituted USD 70.7 million.

¹¹ Excluding debt of direct foreign investors to the resident enterprises of the Kyrgyz Republic.

¹² Excluding debt of resident enterprises to the direct foreign investors.

According to the IMF Payment Balance Guidelines (5th edition), remission of debt (debt cancellation) is a voluntary refusal from the part of the whole amount of debt stipulated in the agreement between the foreign creditors and the debtor-country that experiences difficulties with the payment balance. Debt cancellation is one of the types of debt reorganization that promotes not only savings of budget funds and increasing of the international reserves of the country-creditor, in this case of the Kyrgyz Republic, but also decreases the burden on the payment balance through decreasing the liabilities on debt servicing.

The debt cancellation in the payment balance is recorded as:

- ✓ Inflow of capital transfers in the transaction of the capital account (credit);
- ✓ Decrease of the liabilities on other investments in the financial account (debit).

On September 20, 2012, the Agreement between the governments of the Russian Federation and the Kyrgyz Republic was reached on the regulation of the debt of the Kyrgyz Republic before the Russian Federation on the previously provided credits (hereinafter "Agreement"). The ratification process of the Agreement by the Russian Federation was finalized on April 27, 2013. The agreement entered into force on May 22, 2013.

Cancellation of debt in the amount of USD 188.9 million was indicated in the payment balance of the reporting period (see the Table on payment balance). Writing off of USD 300.0 million by the Russian Federation will be reflected in the payment balance of the first quarter 2016.

The Russian Federation	
<i>Agreement</i>	Agreement between the government of the Russian Federation and the Kyrgyz Republic on the regulation of debt of the Kyrgyz Republic before the Russian Federation on the previously provided credits
<i>Date of agreement</i>	September 20, 2012
<i>Date of effect</i>	May 22, 2013
<i>Amount</i>	USD 488.9 million
<i>Conditions</i>	<p>1) the debt of the Kyrgyz Republic before the Russian Federation shall be cancelled according to the agreement as of September 5, 2005 in the amount of USD 188.9 million without payment of the interests accrued from September 1, 2012 till the effective date of the Agreement;</p> <p>2) Debt on the Agreement as of February 3, 2009 in the amount of USD 300.0 million shall be reduced within 10 years equal to annual shares from March 16, 2016. From this period the interests on the principal amount of the debt shall not be accrued and paid. Payment of the interests accrued by March 16, 2016 shall be carried out according to the schedule under the Agreement as of February 3, 2009.</p>

The “errors and omissions” article was positive in the amount of USD 518.0 million. Positive value of this article indicates incomplete statistical coverage of operations with capital inflows to the country. Currently, for the purposes of reducing of the index of aforementioned article, the National Bank carries out activities on the improvement of the statistical coverage of the balance of payment indices.

Taking into account the additional estimates of the National Bank, the balance of the “errors and omissions” article constituted USD 89.8 million.

Gross international reserves by the end of June 2013 constituted USD 2 024.2 million which covers 3.4 months of the future import of goods and services.

Comment:

* including the allocation of SDR between the IMF countries-members to support their balance of payments had the impact on the value of foreign liabilities. As a result, the liabilities of the Kyrgyz Republic increased by US\$ 132.2 billion.

Long-term investments are investments in financial assets, whose initial maturity was set up, in compliance with a contract, as more than one year or has never been stipulated

Short-term investment are investments in financial assets, with maturity of one year or less than one year, pursuant to contract, or paid as short notice
