## ***Balance of Payments of the Kyrgyz Republic***

“Balance of payments of the Kyrgyz Republic” is issued by the National Bank of the Kyrgyz Republic. The legislative basis for the balance of payments are the Law of the Kyrgyz Republic as of July 29, 1997 No. 59 “On the National Bank of the Kyrgyz Republic” and the Resolution of the Government of the Kyrgyz Republic as of November 3, 2000 No. 645 “On measures to improve statistics of the balance of payments of the Kyrgyz Republic”. This document reflects last tendencies in external sector development and shows statistical data on the balance of payments, external trade, international reserves, external debt and international investment position, as well as construction methods of balance of payments and informational database. This document is published 4 times a year - in January, May, July and October and has 3 language versions: Kyrgyz, Russian and English.

Current publication contains final data of direct, portfolio and other investments of 2013 year.

***Last day for update of data for the present publication is October 20, 2014.***

### **Annotation symbols and notes:**

- ... means the absence of data;
- means, that indicators/ratios are equal to 0 (zero) or insignificant;
- is set between years or months (e.g., 1994-1996 or January-June) and means, that all years and months are covered by the shown dates.

Deviations in last digits may occur because of rounding numbers when summing up. In regard with the possible changes in accounting methods or historical data, which are used in the given document, correction of earlier published data is acceptable. Therefore, 10 years period can be accounted as “open period”.

## THE CURRENT STATUS OF THE PAYMENT BALANCE

**Chart 1. Current Account**

in percent of GDP

According to the results of the first six months of 2014, the trade balance state was improved on the background of decreasing the imports and preserving the growth in the volume of export. This served as a main basis for the reduction of the deficit of the current account position up to 20.2 percent to GDP.

According to the estimates of the National Bank, the deficit of the current account position taking into account the additional estimates of the National Bank of the Kyrgyz Republic<sup>1</sup> constituted 429.5 million USD (16.7 percent to GDP).

### TRADE BALANCE

According to the results of the first half of 2014 there was decrease in the deficit of the trade balance based mainly due to the expansion of supplies of precious metals and decrease in the volume of import of oil-products.

**Chart 2. Trade balance of the Kyrgyz Republic**

in percent of GDP

**The trade balance** of the Kyrgyz Republic for the first half year of 2014 kept with negative balance in the amount of 1 397.1 million USD having decreased by 17.7 percent as compared to the similar indicator of the corresponding period of 2013.

**The external trade turnover** in FOB prices in the reporting period decreased by 4.7 percent and constituted 3 032.1 million USD.

**The export of goods in FOB prices** taking into account the additional estimates of the National Statistics Committee and the National Bank of the Kyrgyz Republic was 817.5 million USD (29.5 percent to GDP)<sup>2</sup>, having increased by 10.2 percent as compared to the indicator of

the first half of 2013. It should be noted that the positive dynamics of the export is based mainly by the increase in the supply of gold. **The export, excluding gold**<sup>3</sup> in January-June of the current year constituted 443.2 million USD having decreased by 2.8 percent as compared to the corresponding indicator of the first six months of 2013. At the same time, the major volume of decrease fell under the re-exported goods, mainly on motor vehicles for the transport of goods and special-purpose motor vehicles, as well as fruits and nuts. It should also be noted that the decrease in the export of the aviation fuel stocks, which is mainly due to the decrease in the number of charter flights serving at the Transit center "Manas".

**The export without gold and re-export**<sup>4</sup> increased by 5.5 percent and constituted 353.4 million USD.

<sup>1</sup> Additional estimates on re-export of oil products and export on trade of "shuttles".

<sup>2</sup> The volume of export without additional estimates of the NBKR and the NSC constituted 732.5 million USD

<sup>3</sup> In FOB prices without additional estimates of NBKR and NSC; for the first six months of 2014 the export without gold with the additional estimates of NBKR and NSC constituted 528.2 million USD.

<sup>4</sup> In FOB prices without additional estimates of NBKR and NSC.

<sup>1</sup> Export of on-board stock

In the reporting period, change in the structure of export by ISTC affected the dynamics of export of largest goods positions. Due to the increase in the export of gold, specific weight of “goods and operations that do not cover other categories of ISTC” grew by 9.1 percentage points and constituted 39.5 percent. Decrease in the volume of export of motor cars for transportation of goods and special purpose motor cars as well as other transport means played a key role in the decrease of their specific weight of the group “vehicles and transport equipment” up to 10.5 percent in the total volume of export. Reduction of the specific weight of the group “manufactured goods not classified by type of material” is caused by the decrease in the volume of supplies of non-precious metals, float glass, rubber tyres, iron, steel and other goods. The share of other group of goods in January-June 2014 remained at the level similar to the previous period.

**Table 2. Structure of Export by the SITC sections\***

\* NSC data in FOB prices

In terms of sectorial structure of export in the Kyrgyz Republic, the primary specific weight falls under the products of **processing industry** (metallurgical, textile and garment industry) and **agriculture**.

Production growth of **metallurgical products** by 9.5 percent<sup>5</sup>, based on the increase of production of precious metals has positively affected the volume of gold export. Despite the decrease in the average contractual prices by 18.1 percent<sup>6</sup>, increase in the physical volume of gold export by 77.1 percent led to the increase in the value capacity of gold export by 45.0 percent.

Regarding other products of metallurgical production except for jewelry and their parts made of precious metals, the volume of supplies decreased.

Despite the dynamic growth in the production of textile, clothes and shoes, leather and leather articles, the growth rates in the production of clothes and clothes accessories in the first six months of 2014 remained moderate<sup>7</sup>. As a result, the volume of export of article of clothing and clothes accessories in January-June of the current year decreased by 2.8 percent (by 1.4 million USD), which was caused mainly by the decrease in the supply on the item line “women’ or girls’ articles of textile fabrics” (by 10.7 percent or 3.9 million USD). Besides, there was decrease in the export on the item line “clothing accessories of textile fabrics whether or not knitted” (by 11.7 percent or 0.5 million USD). There was growth in the volume of export on other items of the products of sewing production.

There was a decrease in the average export prices it should be noted that on the most part of the goods of this group in the reporting period.

<sup>5</sup> “Socio-economic regulation of KR (January-June 2014)”, NSC KR.

<sup>6</sup> In January-June 2014 the average world price of 1 XAU constituted 1 290.2 USD which is by 15.4 percent lower the level of prices of the similar period of 2013; Source: Reuters.

<sup>7</sup> According to NSC in January-June 2014, the volume of production of textile production and production of clothing and shoes, leather, and leather items grew by 9.9 percent including production of clothes by 1.1 percent.

According to the results of January-June 2014, the growth in the production of **agricultural products** constituted 1.4 percent<sup>8</sup>. In the reporting period, there was an increase in supplies of such goods as milk and dairy products, vegetables and cotton by the residents of the Kyrgyz Republic to external markets. It should be noted that the growth of export of vegetables and cotton was provided by the increase in both physical volumes of supplies as well as export prices, whereas, the increase in the supplies of milk and dairy products in January-June of the current year was provided by the significant growth of the volume of export (in 8.2 times) under the decrease in the average contractual prices by 22.2 percent. Along with this, the export of fruits and nuts, live animals, products of cereals, flour and starch, meat and meat products, raw stock and other products decreased. The decrease in the supply of agricultural products, except for the products from cereals, flour and starch was caused by the decrease in the physical volume of supplies as well as the contractual prices of exported goods.

<sup>8</sup> "Socio-economic regulation of KR (January-June 2014)", NSC.

In the first six months of 2014 the specific weight of the registered **re-export**<sup>9</sup> in the general volume of export decreased from 18.5 to 12.3 percent (89.8 million USD). As was mentioned above, the decrease in the re-export was mainly based by the decrease in the supplies on items “motor vehicles for the transport of goods and special-purpose motor vehicles”, the volume of which decreased by 60.7 percent or by 12.2 million USD. Besides, there was reduction in the supply of iron and steel, rubber tyres, parts and accessories of the cars, fertilizers, etc. Along with this, in January-June 2014 there was increase in the re-export of other inorganic chemicals, aircraft and associated equipment as well as motor-cars and transport means devoted for the transportation of passengers.

<sup>9</sup> Re-export is the export of foreign goods from the country (earlier manufactured in other countries or imported), where they were imported without any significant transformations, compared to their condition in which they were initially imported.

**Table 6. Re-export of major products\****(in mln of USD)*

\* In FOB prices, excluding estimates of NBKR and NSC

**In the geographic structure** of the export, according to the results of the reporting period, no significant changes were observed.

As in January-June 2013, the main trade partner of the Kyrgyz Republic are the countries of Customs Union. The Russian Federation, Kazakhstan and Belarus take in general 31.6 percent of export of the country. The specific weight of Switzerland in the general volume of export in the reporting period decreased by 29.6 to 24.7 percent. At the same time, in the first six months of the current year there was growth in the share of United Arab Emirates from 1.4 to 15.5 percent, which has become the result of reallocation of the part of export of gold to this country. In general, in the reporting period, the Kyrgyz Republic exported goods to 75 countries of the world (in January-June 2013 the export was carried out to 79 countries).

Geographic distribution of separate types of goods indicates that except for gold, the main marketing outlets of the domestic goods are the CIS countries. Nevertheless, it should be noted that there is an increase in the specific weight of the non-CIS countries in supplies of such goods as vegetables, fruits and nuts. Thus, the share of Turkey in the export of vegetables reached 40.1 percent (18.3 percent in the first half of 2013), and the specific weight of China in the export of fruits and nuts is 19.8 percent (3.5 percent in January – June 2013).

At the same time, the level of geographic concentration on the majority of the largest export goods remains high.

\* NSC data in CIF prices

In the reporting period in the **goods structure** of import the biggest specific weight was given to the cars and transport equipment (24.9 percent). The price volume of import of goods of the given group decreased by 8.4 percent and constituted 597.1 million USD<sup>10</sup>. The main impact on the reduction of the given group was the reduction of the import of vehicles for the transportation of goods and vehicles of the special purpose. Along with this, the volumes of import of such items as “aircraft and associated equipment”, “internal combustion piston engines”, “mechanical shovels, excavators and shovel-loaders, self-propelled”. The indicated reduction was partially compensated by the increase in the volume of imported used motor cars and trucks and other motor vehicles principally designed for the transport of people, different electric devices and transformers.

It should be noted that the separate goods of this group such as parts and accessories of cars, aircraft and associated equipment, motor vehicles for the transport of goods and special-purpose motor vehicles and others are partially imported for the further re-export.

<sup>10</sup> According to the data of the NSC in CIF prices.

\* NSC data in CIF prices

The specific weight of the group “mineral fuel, lubricants and similar materials” according to the results of the first six months of the current year decreased by 3.5 percentage points and constituted 18.5 percent (442.5 million USD in terms of value). The prevailing specific weight in the given group falls under the oil products.

In the reporting period there was a decrease in the volume of import of oil products by 24.6 percent. The given decrease took place due to the decrease in the physical volume of import of the oil products by 21.8 percent and average contractual prices by 3.8 percent as compared to the corresponding indicators of January-June 2013. The main contribution to the reduction of the import of fuel, oil and lubricants were made by the motor petrol, diesel and aviation fuel, the volumes of import of which in aggregate decreased by 28.5 percent (by 139.0 million USD in an absolute expression). At the same time there is an increase in the supply of fuel-oil residual, crude oil and other oil-products (in aggregate constituted 60.7 percent or by 12.8 million USD).

\* NCS data in CIF prices

Besides the lubricants, the significant share in this groups falls under the natural gas and coal. The supplies of the latter in the reporting period decreased by 29.2 and 4.3 percent accordingly (by 0.6 and 12.1 million USD in an absolute expression).

The specific weight of the manufactured goods classified by type of the material increased by 1.9 percentage points and constituted 17.2 percent from the total volume of imported goods. The largest goods in this group of goods is the items “iron and steel”, the import of which in the reporting period grew by 6.1 percent against the first half of 2013. The significant goods of this group are also textile fabric, rubber tyres, different items from paper and metal as well as construction materials. The volume of import of the textile fabrics and rubber tyres in January-June of the current year was decreased by 7.0 and 33.5 percent accordingly. There was a growth in the cost parameters on the remaining goods of the given group based on the increase in both physical volumes of import as well as import prices.

\* NSC data in CIF prices

**In the geographic distribution** of the import within the reporting period there was a decrease in the specific weight of the countries of the Customs Union (from 46.3 percent to 43.9 percent). Accordingly, the specific weight of the other countries exceeded the half of the import (56.1 percent).

The main supplier of the lubricant materials remains the Russian Federation. The import of the main food products is also carried out predominantly from the CIS countries. The largest groups of food products as cereals and products from cereal as well as other products as sugar, vegetable oil and other products are imported from the above mentioned countries.

The specific weight of the non-CIS countries is more vivid in the structure of the imported non-food consumer goods. Thus, the aggregate specific weight of China and Turkey on the supplies of clothes exceeded 93.0 percent. More than 80.0 percent of imported cars come from the non-CIS countries, predominantly from Japan, Germany, Korea and USA.

\* NSC data in CIF prices

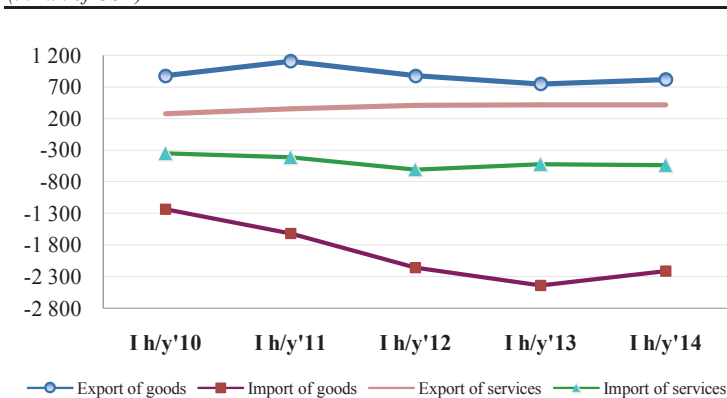

In general, in the reporting period the import to the Kyrgyz Republic was carried out from 125 countries of the world (in January-June 2013 from 123 countries).

### BALANCE OF INTERNATIONAL SERVICES

Despite the reduction of the volume of external trade in the Kyrgyz Republic, the volume of international services increased within the reporting period.

**Chart 3. External service and goods trade\***

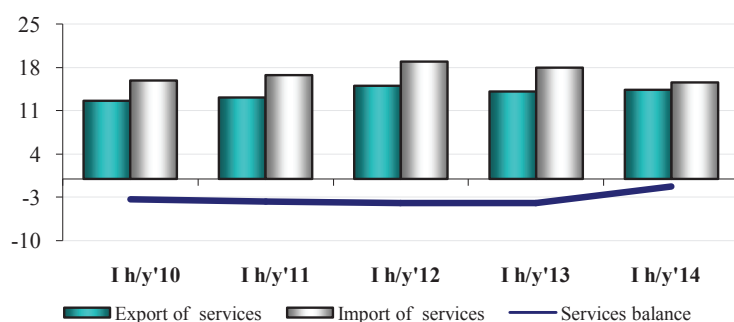

(in mln of USD)

\* NBKR data including estimates of NBKR and NSC

**Chart 4. Balance of International services**

in percent of GDP

At the same time, the decrease in the export of transport services by 15.2 percent was observed, whereas, the import of transport services increased by 2.4 percent. Decrease in the level of transport services provided to non-residents took place mainly due to the decrease in the export of services of air transport by 27.2 percent. Despite the decrease in the import of motor car transport services by 22.1 percent, the growth of services in the field of airway, railway and other type of transport provided to residents of the country justified the growth of the total volume of import of transport services.

Balance of the item “travels” was with surplus in the amount of 12.2 million USD, which is by 80.7 percent lower of the compared indicator in the first half of 2013. This has become the consequence of the reduction of the export of services connected with the travels (by 22.7 percent) as compared to the volume of services provided to the residents of the Kyrgyz Republic during their stay abroad (by 0.5 percent).

The net export of the business services for the reporting period was positive and achieved 31.9 million USD having increased by 63.5 percent as compared to the corresponding period of the previous year. Improvement of the indicators on the business services was the result of the growth of the export of this type of service by 3.6 percent, whereas, their import decreased by 20.3 percent. The main factor that affected the decrease in the import of business services was the reduction of the consulting services provided to the residents of the Kyrgyz Republic. The decrease in the export of the given type of services is connected first of all with the reduction of the export of architectural, engineer and technical services as well as services in the field of mineral resource industry.

According to the results of the first six months of the current year, the international services increased by 0.8 percent and constituted 952.3 million USD.

**The balance of international services** (neutral balance of payment) was negative and constituted 128.1 million USD, which is by 17.8 percent higher of the deficit of the balance of services in the corresponding period of the previous year. At the same time there was a growth of the import of services by 2.6 percent whereas the volume of services provided by the residents of the Kyrgyz Republic to non-residents decreased by 1.4 percent.

In the reporting period **the export of services** reached 412.1 million USD which corresponds to 50.4 percent from the volume of export of goods. **The import of services** was in the amount of 540.1 million USD which is 24.4 percent from the import of goods.

In the reporting period, the main services were traditionally transport services, travels and business services, which in total constituted 83.1 percent of international services.

Balance of transport services in the first half of 2014 as before was found negative and constituted 211.0 million USD, which is by 9.5 percent higher than in January-June 2013. At the

**INCOME**

*Dynamics of the item line “incomes” was defined mainly by the change in the volume of income on direct investments accrued to the payment of non-residents.*

In January-June 2014 the balance of the item “income” was negative and constituted 118.9 million USD which by 30.2 percent lower of the similar indicator of the first half of 2013.

The given tendency was mainly based by the decrease in the income of foreign direct investors from the investment activity in the Kyrgyz Republic due to the reduction in the volume of reinvested income of the entities from 132.1 to 77.8 million USD (decrease by 41.1 percent). The volume of distributed incomes of the companies-residents in the form of dividends in favor of foreign direct investors increased by 26.0 percent and constituted 10.4 million USD. As a result, the deficit of the incomes on direct investments decreased from 140.4 to 88.2 million USD (decrease by 37.2 percent).

In the reporting period the volume of the payment of the interests on the previously received loans increased by 6.4 percent due to the growth of the payments on loans of the government sector and constituted 30.9 million USD. At the same time there was a growth in the volume of other incomes received by the residents of the country on other investments from 10.2 to 11.4 million USD. In general, this contributed to the increase in the deficit of the item line “incomes on other investments” by 3.4 percent (to 19.5 million USD).

In the first half of 2014 the balance of the item line “employee compensation” was also negative in the amount of 11.2 million USD (growth by 2.0 percent), which was based by the increase in the aggregate volume of income of non-residents from the labor activity in the Kyrgyz Republic.

**TRANSFERS**

*The trend of growth in the volume of income in the item “current transfers” slowed down but remained positive.*

The positive balance of the **current transfers** according to the results of the first half of 2014 achieved 969.3 million USD by 2.5 percent having exceeded the level of the comparative period of the previous year.

The defining impact on the account of current transfers was played by **private transfers** (other sectors); net inflow of the latter decreased by 0.2 percent and constituted 940.3 million USD. The indicated decrease was caused by the growth of outflow of private transfers by 31.8 million USD as compared to the similar period of 2013, whereas, the inflow increased only by 29.4 million USD.

In the structure of private transfers, the remittances of the labor migrants have the defining meaning, the specific weight of the latter in the gross volume of remittances of private transfers constitute 97.6 percent. In the reporting period, the growth of the gross inflow of money transfers by 3.7 percent was covered by the increase in their outflow from the country by 19.0 percent which led to the moderate growth of the net volume of entered transfers to 913.9 million USD (growth by 0.9 percent).

\* Including estimates of NBKR

<sup>1</sup> Remittances exceeding 3000 US dollar are not taken into account<sup>2</sup> Additional estimation coefficient of 10% is used for assessing remittances which migrants inflow in cash

The main ways of money transfers of the labor migrants to the country are through the money transfer systems<sup>11</sup>. In January-June 2014, the net volume of transfers through the money transfer systems constituted 830.2 million USD<sup>12</sup>, thus, having exceeded by 0.9 percent compared to the similar period of the first half of 2013. At the same time, the geographic structure of money transfers remains unchanged. According to the results of the first half of 2014, the main share of the money transfers came from the Russian Federation (96.9 percent). The specific weight of other countries is significantly lower: 0.9 percent of transfers came from the USA and Kazakhstan. In the structure of transfers made from the Kyrgyz Republic, the prevailing specific weight also falls under the Russian Federation (94.7 percent).

**Chart 5. Balance of remittance and Net Export of Consumer Goods**

*in percent of GDP*

Money transfers remain the main source of financing of the trade deficit. The balance of money transfers covers the net export of consumer goods as before which in turn, was found negative in the amount of 667.8 million USD.

In the first half of 2014, the balance of the current transfers in the **sector of state management** (neutral presentation of the payment balance) was positive in the amount of 29.0 million USD, which is more than 10 times higher than the corresponding indicator of the similar period of 2013. The volume of money grants received by the state sector constituted 30.3 million USD, out

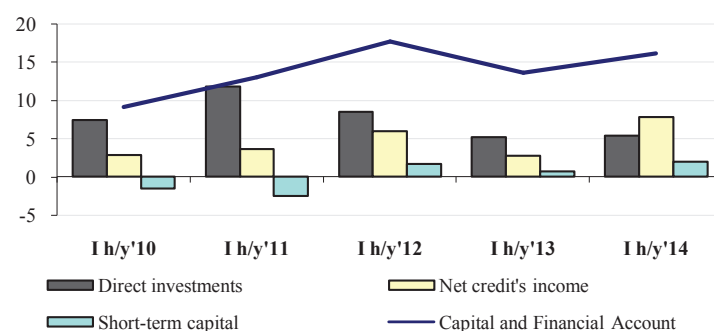

of which 30.0 million USD constitutes the grant provided by the Russian Federation to the Kyrgyz Republic for the purpose of supporting the budget that was provided in the first quarter of the current year. The volume of the paid membership fees in the international organizations in the reporting period decreased by 19.8 percent and constituted 1.2 million USD.

## CAPITAL TRANSACTION ACCOUNT AND FINANCIAL ACCOUNT OPERATIONS

*In the first half of 2014, the capital account and financial account remained positive as before. The key role in forming of the latter was played by the loans of the state sector.*

**Chart 6. Capital and Financial Account**

*in percent of GDP*

According to the results of the first half of 2014, **capital and financial account transactions** were formed with positive balance in the amount of 480.3 million USD which is by 6.7 percent higher than the corresponding indicator of the similar period of 2013.

The balance of **capital account transactions** was found positive in the amount of 22.9 million USD, which is by 89.8 percent lower than the level achieved in the first half of 2013. The decrease in the indicators in the reporting period was based due to writing off the debt by the Russian Federation in the amount of 188.9 million USD in

the second quarter 2013<sup>13</sup>, which significantly increased the positive balance of the capital account transactions in the first half of the last year.

<sup>11</sup> Anelik, BLIZKO, Contact, Migom, Money Gram, Western Union, Unistream, Zolotaya Corona, Leader, Bystraya Pochta, ALLUR and other money transfer systems and remittances via the PE "Kyrgyzpochtasy.

<sup>12</sup> Without additional estimates of the NBKR.

<sup>13</sup> Agreement between the government of the Russian Federation and the government of the Kyrgyz Republic on regulating the debt of the Kyrgyz Republic before the Russian Federation on the previously provided loans.

The **financial account** on the results of the first half of 2014 remained with positive balance in the amount of 457.5 million USD, which is by 2.0 times higher than in January-June 2013. The main inflow of capital in the reporting period was observed in the item line “other investments”.

According to the results of January-June 2014, the net volume of funds attracted to the republic on the item “**other investments**” remained with positive meaning and achieved 480.7 million USD. The main impact on the dynamics of the given item was the increase in the liabilities of the residents of the country by 450.0 million USD due to the growth of attracted external loans to the economy, mainly to the sector of state management.

The net inflow of the loans in the reporting period remained with the negative balance and constituted 296.4 million USD.

The gross inflow of loans of the state sector increased by 94.0 percent and constituted 252.0 million USD. Payments of the official sector on the major amount of the debt on previously received loans in the reporting period was in the amount of 26.9 million USD. As a result, the net volume of loans received by the state reached 225.1 million USD having significantly exceeded the level achieved in the first half of 2013.

The volume of payment of the private sector on maintenance of the previously received loans in the reporting period decreased by 6.2 percent (157.4 million USD), whereas, the inflow of loans achieved 228.7 million USD having increased by 28.4 percent. As a result, the net inflow of the loans in the private sector constituted at the level of 71.3 million USD having significantly exceeded the level of the similar period of the previous year (10.4 million USD).

The volume of the loan debt of the entities-residents in the reporting period was increased by 134.1 million USD (growth by 12.4 percent). In general, the prevailing specific weight in the general volume of the loan debt are the entities of processing industry, wholesale and retail trade, information and communication, scientific and technical activity as well as the entities in the field of construction, for which make up 85.4 percent of the amount of debt.

Assets of the residents in the reporting period decreased by 30.7 million USD which is mainly based by the reduction of the assets of commercial banks abroad by 27.3 million USD. The debt receivables of the residents in January-June of the current year decreased by 8.0 million USD, whereas, in the period of 2013 there was an increase by 36.6 million USD. As of the end of June 2014, generally, 89.0 percent of the gross volume of debt receivables was under the entities of processing industry, institutes in the field of professional, scientific and technical activities, the sector of wholesale and retail trade and construction.

In the reporting period, the assets of the residents placed in the accounts of foreign banks increased by 2.5 million USD. It should be noted that as of the end of the first half of 2014, more than 90.0 percent of the aggregate volume of balances in the accounts of entities abroad fell under the entities of the processing industry.

Balance on the item “**direct investment**” in the reporting period was negative and constituted 17.4 million USD, whereas, in January-June 2013, it was found with positive meaning and constituted 222.8 million USD. The main impact on this tendency was made by the increase in the outflow of the financial means, invested into other capital up to 121.5 million USD mainly due to the growth of the volume of redemption of the principal amount on the loans received by the entities-residents from the foreign co-owners.

Net inflow of the re-invested incomes in the reporting period decreased by 41.1 percent and constituted 77.8 million USD. At the same time the net inflow of financial means invested into the capital stock achieved 26.4 million USD (the growth is more than 10.0 times).

In the reporting period, the highest net outflow of direct investments in the sector of economic activities was in the entities of the processing industry. There was an inflow of investments on the entities of the financial mediation and insurance sector as well as on economic sectors in the field of professional, scientific and technical activities. The inflow of capital from Great Britain prevailed in the geographic structure of direct investments, whereas, the outflow of funds from the direct investments was observed to China, Australia, Switzerland and Canada.

According to the results of the first half of 2014, **the general balance of the payment balance** constituted negative in the amount of 74.1 million USD.

The balance of the item line “**errors and omissions**” was found positive in the amount of 120.4 million USD which indicates to the insufficient statistical account of operations connected with the inflow of capital to the country or the export of the goods and services.

The volume of gross international reserves by the end of June 2014 constituted 2 182.5 million USD which covers 3.9 months of the future import of goods and services.

Comment:

\* Including the allocation of SDR between the IMF countries-members to support their balance of payments had the impact on the value of foreign liabilities. As a result, the liabilities of the Kyrgyz Republic increased by US\$ 132.2 billion.

Long-term investments are investments in financial assets, whose initial maturity was set up, in compliance with a contract, as more than one year or has never been stipulated

Short-term investment are investments in financial assets, with maturity of one year or less than one year, pursuant to contract, or paid as short notice
